

State Board Previous Year Practice 2022 (2022)

Subject: General | Topic: Machine Learning

1. What is the most accurate beginner-level explanation of accuracy? (variation 87)
2. Which statement best describes training data in Machine Learning?
3. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 84)
4. What is the most accurate beginner-level explanation of accuracy?
5. Which statement best describes overfitting in Machine Learning? (variation 105)
6. Which option is a correct use case for confusion matrix in Machine Learning?
7. Which option is a correct use case for confusion matrix in Machine Learning? (variation 108)
8. What is the most accurate beginner-level explanation of labels? (variation 92)
9. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 104)
10. Which option is a correct use case for regression in Machine Learning?
11. What is the most accurate beginner-level explanation of labels? (variation 82)
12. Which option is a correct use case for confusion matrix in Machine Learning? (variation 78)
13. When working with Machine Learning, why would a developer use train-test split? (variation 96)
14. When working with Machine Learning, why would a developer use train-test split? (variation 356)
15. Which option is a correct use case for regression in Machine Learning? (variation 73)
16. When working with Machine Learning, why would a developer use features? (variation 351)
17. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 89)

18. What is the most accurate beginner-level explanation of accuracy? (variation 107)
19. When working with Machine Learning, why would a developer use features?
20. Which option is a correct use case for regression in Machine Learning? (variation 353)
21. What is the most accurate beginner-level explanation of labels?
22. Which statement best describes training data in Machine Learning? (variation 80)
23. Which option is a correct use case for confusion matrix in Machine Learning? (variation 98)
24. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 74)
25. What is the most accurate beginner-level explanation of labels? (variation 352)
26. Which option is a correct use case for regression in Machine Learning? (variation 93)
27. A student says 'gradient descent' is not relevant to real projects. What is the best correction?
28. Which option is a correct use case for confusion matrix in Machine Learning? (variation 358)
29. Which statement best describes overfitting in Machine Learning? (variation 85)
30. What is the most accurate beginner-level explanation of accuracy? (variation 357)
31. Which statement best describes overfitting in Machine Learning? (variation 75)
32. Which option is a correct use case for regression in Machine Learning? (variation 83)
33. What is the most accurate beginner-level explanation of labels? (variation 72)
34. Which statement best describes training data in Machine Learning? (variation 90)
35. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 354)
36. Which statement best describes training data in Machine Learning? (variation 350)

37. When working with Machine Learning, why would a developer use train-test split? (variation 76)
38. When working with Machine Learning, why would a developer use features? (variation 81)
39. When working with Machine Learning, why would a developer use features? (variation 71)
40. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 94)
41. When working with Machine Learning, why would a developer use features? (variation 101)
42. Which statement best describes overfitting in Machine Learning?
43. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 79)
44. When working with Machine Learning, why would a developer use train-test split?
45. When working with Machine Learning, why would a developer use features? (variation 91)
46. Which option is a correct use case for regression in Machine Learning? (variation 103)
47. Which option is a correct use case for confusion matrix in Machine Learning? (variation 88)
48. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 99)
49. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 359)
50. Which statement best describes overfitting in Machine Learning? (variation 355)
51. A student says 'classification' is not relevant to real projects. What is the best correction?
52. Which statement best describes overfitting in Machine Learning? (variation 95)
53. What is the most accurate beginner-level explanation of labels? (variation 102)
54. When working with Machine Learning, why would a developer use train-test split? (variation 86)
55. What is the most accurate beginner-level explanation of accuracy? (variation 97)

56. What is the most accurate beginner-level explanation of accuracy? (variation 77)
57. When working with Machine Learning, why would a developer use train-test split? (variation 106)
58. Which statement best describes training data in Machine Learning? (variation 70)
59. Which statement best describes training data in Machine Learning? (variation 100)
60. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 109)
