

IIT-JEE Previous Year Practice 2024 (2024)

Subject: General | Topic: Machine Learning

1. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 104)
2. What is the most accurate beginner-level explanation of labels? (variation 82)
3. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 94)
4. Which option is a correct use case for confusion matrix in Machine Learning? (variation 358)
5. What is the most accurate beginner-level explanation of labels? (variation 102)
6. When working with Machine Learning, why would a developer use features? (variation 351)
7. Which option is a correct use case for confusion matrix in Machine Learning? (variation 98)
8. Which option is a correct use case for confusion matrix in Machine Learning?
9. Which statement best describes training data in Machine Learning? (variation 70)
10. What is the most accurate beginner-level explanation of labels?
11. What is the most accurate beginner-level explanation of labels? (variation 72)
12. Which option is a correct use case for regression in Machine Learning? (variation 93)
13. When working with Machine Learning, why would a developer use train-test split? (variation 356)
14. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 74)
15. When working with Machine Learning, why would a developer use train-test split? (variation 96)
16. When working with Machine Learning, why would a developer use features? (variation 91)
17. Which statement best describes overfitting in Machine Learning?

18. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 109)
19. When working with Machine Learning, why would a developer use features? (variation 101)
20. Which option is a correct use case for regression in Machine Learning?
21. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 84)
22. Which option is a correct use case for regression in Machine Learning? (variation 353)
23. Which option is a correct use case for confusion matrix in Machine Learning? (variation 78)
24. What is the most accurate beginner-level explanation of accuracy? (variation 77)
25. What is the most accurate beginner-level explanation of accuracy? (variation 87)
26. What is the most accurate beginner-level explanation of labels? (variation 352)
27. When working with Machine Learning, why would a developer use features?
28. Which statement best describes training data in Machine Learning? (variation 100)
29. Which option is a correct use case for regression in Machine Learning? (variation 103)
30. What is the most accurate beginner-level explanation of accuracy?
31. What is the most accurate beginner-level explanation of labels? (variation 92)
32. Which option is a correct use case for regression in Machine Learning? (variation 73)
33. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 354)
34. What is the most accurate beginner-level explanation of accuracy? (variation 107)
35. When working with Machine Learning, why would a developer use features? (variation 71)
36. When working with Machine Learning, why would a developer use train-test split? (variation 86)

37. Which statement best describes overfitting in Machine Learning? (variation 85)
38. When working with Machine Learning, why would a developer use train-test split? (variation 106)
39. Which option is a correct use case for regression in Machine Learning? (variation 83)
40. When working with Machine Learning, why would a developer use train-test split?
41. Which statement best describes overfitting in Machine Learning? (variation 355)
42. Which statement best describes overfitting in Machine Learning? (variation 75)
43. Which option is a correct use case for confusion matrix in Machine Learning? (variation 108)
44. Which statement best describes training data in Machine Learning? (variation 90)
45. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 99)
46. Which statement best describes training data in Machine Learning?
47. Which statement best describes overfitting in Machine Learning? (variation 95)
48. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 359)
49. What is the most accurate beginner-level explanation of accuracy? (variation 357)
50. A student says 'gradient descent' is not relevant to real projects. What is the best correction?
51. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 89)
52. Which statement best describes training data in Machine Learning? (variation 350)
53. A student says 'classification' is not relevant to real projects. What is the best correction?
54. When working with Machine Learning, why would a developer use train-test split? (variation 76)
55. When working with Machine Learning, why would a developer use features? (variation 81)

56. Which statement best describes overfitting in Machine Learning? (variation 105)

57. Which statement best describes training data in Machine Learning? (variation 80)

58. Which option is a correct use case for confusion matrix in Machine Learning? (variation 88)

59. What is the most accurate beginner-level explanation of accuracy? (variation 97)

60. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 79)
