

UPSC Previous Year Practice 2022 (2022)

Subject: General | Topic: Machine Learning

1. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 79)
2. Which option is a correct use case for regression in Machine Learning?
3. Which statement best describes overfitting in Machine Learning?
4. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 354)
5. What is the most accurate beginner-level explanation of accuracy? (variation 77)
6. What is the most accurate beginner-level explanation of labels?
7. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 104)
8. Which statement best describes overfitting in Machine Learning? (variation 95)
9. When working with Machine Learning, why would a developer use train-test split? (variation 356)
10. Which option is a correct use case for regression in Machine Learning? (variation 353)
11. What is the most accurate beginner-level explanation of accuracy? (variation 97)
12. What is the most accurate beginner-level explanation of labels? (variation 72)
13. What is the most accurate beginner-level explanation of labels? (variation 82)
14. Which option is a correct use case for confusion matrix in Machine Learning? (variation 98)
15. When working with Machine Learning, why would a developer use train-test split?
16. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 359)
17. Which statement best describes training data in Machine Learning?

18. What is the most accurate beginner-level explanation of labels? (variation 102)
19. A student says 'gradient descent' is not relevant to real projects. What is the best correction?
20. Which statement best describes overfitting in Machine Learning? (variation 75)
21. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 89)
22. When working with Machine Learning, why would a developer use train-test split? (variation 76)
23. When working with Machine Learning, why would a developer use features?
24. When working with Machine Learning, why would a developer use features? (variation 81)
25. Which option is a correct use case for confusion matrix in Machine Learning? (variation 88)
26. When working with Machine Learning, why would a developer use features? (variation 351)
27. Which statement best describes training data in Machine Learning? (variation 90)
28. Which statement best describes overfitting in Machine Learning? (variation 355)
29. Which statement best describes overfitting in Machine Learning? (variation 85)
30. A student says 'classification' is not relevant to real projects. What is the best correction?
31. Which statement best describes training data in Machine Learning? (variation 80)
32. What is the most accurate beginner-level explanation of accuracy?
33. Which option is a correct use case for regression in Machine Learning? (variation 103)
34. What is the most accurate beginner-level explanation of accuracy? (variation 87)
35. Which option is a correct use case for regression in Machine Learning? (variation 83)
36. Which option is a correct use case for confusion matrix in Machine Learning? (variation 108)

37. When working with Machine Learning, why would a developer use train-test split? (variation 86)
38. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 109)
39. What is the most accurate beginner-level explanation of accuracy? (variation 357)
40. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 99)
41. What is the most accurate beginner-level explanation of accuracy? (variation 107)
42. Which option is a correct use case for regression in Machine Learning? (variation 73)
43. What is the most accurate beginner-level explanation of labels? (variation 352)
44. When working with Machine Learning, why would a developer use features? (variation 71)
45. Which option is a correct use case for confusion matrix in Machine Learning?
46. When working with Machine Learning, why would a developer use train-test split? (variation 96)
47. When working with Machine Learning, why would a developer use train-test split? (variation 106)
48. Which statement best describes training data in Machine Learning? (variation 70)
49. Which statement best describes training data in Machine Learning? (variation 350)
50. Which option is a correct use case for confusion matrix in Machine Learning? (variation 358)
51. Which statement best describes overfitting in Machine Learning? (variation 105)
52. When working with Machine Learning, why would a developer use features? (variation 101)
53. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 74)
54. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 94)
55. Which statement best describes training data in Machine Learning? (variation 100)

56. Which option is a correct use case for regression in Machine Learning? (variation 93)

57. What is the most accurate beginner-level explanation of labels? (variation 92)

58. When working with Machine Learning, why would a developer use features? (variation 91)

59. Which option is a correct use case for confusion matrix in Machine Learning? (variation 78)

60. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 84)
