

UPSC Previous Year Practice 2024 (2024)

Subject: General | Topic: Machine Learning

1. Which option is a correct use case for confusion matrix in Machine Learning?
2. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 84)
3. Which option is a correct use case for regression in Machine Learning? (variation 353)
4. Which statement best describes training data in Machine Learning?
5. Which statement best describes overfitting in Machine Learning? (variation 355)
6. Which option is a correct use case for confusion matrix in Machine Learning? (variation 88)
7. What is the most accurate beginner-level explanation of labels? (variation 352)
8. What is the most accurate beginner-level explanation of labels? (variation 92)
9. What is the most accurate beginner-level explanation of accuracy?
10. Which statement best describes overfitting in Machine Learning? (variation 75)
11. Which statement best describes overfitting in Machine Learning? (variation 85)
12. When working with Machine Learning, why would a developer use train-test split? (variation 356)
13. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 99)
14. When working with Machine Learning, why would a developer use features? (variation 71)
15. Which statement best describes training data in Machine Learning? (variation 100)
16. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 89)
17. What is the most accurate beginner-level explanation of accuracy? (variation 87)

18. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 74)
19. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 104)
20. When working with Machine Learning, why would a developer use train-test split? (variation 76)
21. Which statement best describes overfitting in Machine Learning? (variation 95)
22. When working with Machine Learning, why would a developer use train-test split? (variation 106)
23. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 94)
24. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 109)
25. What is the most accurate beginner-level explanation of labels? (variation 72)
26. Which option is a correct use case for regression in Machine Learning?
27. What is the most accurate beginner-level explanation of accuracy? (variation 357)
28. Which option is a correct use case for confusion matrix in Machine Learning? (variation 98)
29. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 79)
30. A student says 'gradient descent' is not relevant to real projects. What is the best correction? (variation 359)
31. Which statement best describes training data in Machine Learning? (variation 80)
32. Which option is a correct use case for confusion matrix in Machine Learning? (variation 78)
33. What is the most accurate beginner-level explanation of accuracy? (variation 107)
34. When working with Machine Learning, why would a developer use train-test split? (variation 86)
35. Which option is a correct use case for regression in Machine Learning? (variation 93)
36. Which statement best describes overfitting in Machine Learning?

37. Which statement best describes training data in Machine Learning? (variation 90)
38. A student says 'classification' is not relevant to real projects. What is the best correction? (variation 354)
39. When working with Machine Learning, why would a developer use train-test split? (variation 96)
40. When working with Machine Learning, why would a developer use features?
41. What is the most accurate beginner-level explanation of labels? (variation 102)
42. What is the most accurate beginner-level explanation of labels?
43. When working with Machine Learning, why would a developer use features? (variation 351)
44. When working with Machine Learning, why would a developer use features? (variation 91)
45. Which option is a correct use case for regression in Machine Learning? (variation 103)
46. Which statement best describes training data in Machine Learning? (variation 350)
47. What is the most accurate beginner-level explanation of labels? (variation 82)
48. When working with Machine Learning, why would a developer use train-test split?
49. A student says 'classification' is not relevant to real projects. What is the best correction?
50. Which statement best describes overfitting in Machine Learning? (variation 105)
51. Which option is a correct use case for confusion matrix in Machine Learning? (variation 108)
52. What is the most accurate beginner-level explanation of accuracy? (variation 97)
53. Which option is a correct use case for confusion matrix in Machine Learning? (variation 358)
54. Which option is a correct use case for regression in Machine Learning? (variation 73)
55. When working with Machine Learning, why would a developer use features? (variation 101)

56. Which option is a correct use case for regression in Machine Learning? (variation 83)

57. When working with Machine Learning, why would a developer use features? (variation 81)

58. A student says 'gradient descent' is not relevant to real projects. What is the best correction?

59. What is the most accurate beginner-level explanation of accuracy? (variation 77)

60. Which statement best describes training data in Machine Learning? (variation 70)
