

CBSE Previous Year Practice 2018 (2018)

Subject: General | Topic: Computer Networks

1. A student says 'ports' is not relevant to real projects. What is the best correction?
2. Which option is a correct use case for latency in Computer Networks? (variation 78)
3. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 354)
4. What is the most accurate beginner-level explanation of TCP? (variation 92)
5. What is the most accurate beginner-level explanation of switches?
6. Which option is a correct use case for latency in Computer Networks? (variation 88)
7. When working with Computer Networks, why would a developer use routing? (variation 76)
8. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 359)
9. Which option is a correct use case for latency in Computer Networks? (variation 108)
10. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 104)
11. When working with Computer Networks, why would a developer use routing?
12. What is the most accurate beginner-level explanation of switches? (variation 77)
13. Which statement best describes HTTP in Computer Networks? (variation 75)
14. Which statement best describes IP addresses in Computer Networks?
15. When working with Computer Networks, why would a developer use routing? (variation 86)
16. When working with Computer Networks, why would a developer use subnets?
17. Which statement best describes IP addresses in Computer Networks? (variation 350)

18. What is the most accurate beginner-level explanation of TCP? (variation 82)
19. What is the most accurate beginner-level explanation of TCP?
20. Which statement best describes HTTP in Computer Networks? (variation 105)
21. Which statement best describes IP addresses in Computer Networks? (variation 70)
22. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 109)
23. What is the most accurate beginner-level explanation of switches? (variation 97)
24. Which option is a correct use case for UDP in Computer Networks? (variation 103)
25. When working with Computer Networks, why would a developer use subnets? (variation 81)
26. Which statement best describes IP addresses in Computer Networks? (variation 100)
27. What is the most accurate beginner-level explanation of TCP? (variation 352)
28. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 94)
29. When working with Computer Networks, why would a developer use subnets? (variation 101)
30. What is the most accurate beginner-level explanation of TCP? (variation 102)
31. When working with Computer Networks, why would a developer use routing? (variation 106)
32. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 89)
33. What is the most accurate beginner-level explanation of switches? (variation 87)
34. Which option is a correct use case for latency in Computer Networks? (variation 98)
35. Which option is a correct use case for UDP in Computer Networks? (variation 73)
36. When working with Computer Networks, why would a developer use routing? (variation 356)

37. Which option is a correct use case for UDP in Computer Networks? (variation 83)
38. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 84)
39. Which statement best describes HTTP in Computer Networks? (variation 85)
40. What is the most accurate beginner-level explanation of switches? (variation 107)
41. When working with Computer Networks, why would a developer use routing? (variation 96)
42. Which statement best describes HTTP in Computer Networks? (variation 95)
43. Which statement best describes HTTP in Computer Networks?
44. Which statement best describes HTTP in Computer Networks? (variation 355)
45. Which option is a correct use case for UDP in Computer Networks? (variation 93)
46. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 79)
47. When working with Computer Networks, why would a developer use subnets? (variation 91)
48. Which option is a correct use case for latency in Computer Networks? (variation 358)
49. When working with Computer Networks, why would a developer use subnets? (variation 71)
50. Which option is a correct use case for UDP in Computer Networks? (variation 353)
51. When working with Computer Networks, why would a developer use subnets? (variation 351)
52. What is the most accurate beginner-level explanation of switches? (variation 357)
53. Which statement best describes IP addresses in Computer Networks? (variation 90)
54. Which option is a correct use case for latency in Computer Networks?
55. Which option is a correct use case for UDP in Computer Networks?

56. A student says 'DNS' is not relevant to real projects. What is the best correction?

57. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 99)

58. What is the most accurate beginner-level explanation of TCP? (variation 72)

59. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 74)

60. Which statement best describes IP addresses in Computer Networks? (variation 80)
