

State Board Previous Year Practice 2023 (2023)

Subject: General | Topic: Computer Networks

1. Which option is a correct use case for latency in Computer Networks? (variation 88)
2. A student says 'DNS' is not relevant to real projects. What is the best correction?
3. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 354)
4. Which option is a correct use case for UDP in Computer Networks? (variation 353)
5. Which option is a correct use case for latency in Computer Networks? (variation 358)
6. Which statement best describes IP addresses in Computer Networks? (variation 350)
7. Which statement best describes HTTP in Computer Networks? (variation 105)
8. What is the most accurate beginner-level explanation of TCP?
9. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 109)
10. What is the most accurate beginner-level explanation of TCP? (variation 82)
11. Which option is a correct use case for UDP in Computer Networks? (variation 73)
12. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 84)
13. What is the most accurate beginner-level explanation of switches? (variation 107)
14. Which option is a correct use case for latency in Computer Networks?
15. A student says 'ports' is not relevant to real projects. What is the best correction?
16. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 74)
17. What is the most accurate beginner-level explanation of switches? (variation 77)

18. What is the most accurate beginner-level explanation of TCP? (variation 352)
19. When working with Computer Networks, why would a developer use routing? (variation 86)
20. What is the most accurate beginner-level explanation of TCP? (variation 102)
21. When working with Computer Networks, why would a developer use subnets? (variation 91)
22. What is the most accurate beginner-level explanation of switches? (variation 97)
23. When working with Computer Networks, why would a developer use subnets? (variation 101)
24. Which statement best describes HTTP in Computer Networks? (variation 85)
25. Which statement best describes HTTP in Computer Networks? (variation 355)
26. What is the most accurate beginner-level explanation of TCP? (variation 92)
27. When working with Computer Networks, why would a developer use subnets?
28. Which statement best describes IP addresses in Computer Networks? (variation 90)
29. Which statement best describes HTTP in Computer Networks? (variation 75)
30. What is the most accurate beginner-level explanation of switches? (variation 357)
31. What is the most accurate beginner-level explanation of switches? (variation 87)
32. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 79)
33. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 89)
34. When working with Computer Networks, why would a developer use subnets? (variation 351)
35. Which option is a correct use case for UDP in Computer Networks? (variation 83)
36. Which statement best describes IP addresses in Computer Networks? (variation 80)

37. What is the most accurate beginner-level explanation of switches?
38. When working with Computer Networks, why would a developer use routing?
39. Which option is a correct use case for latency in Computer Networks? (variation 108)
40. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 94)
41. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 359)
42. When working with Computer Networks, why would a developer use routing? (variation 106)
43. What is the most accurate beginner-level explanation of TCP? (variation 72)
44. When working with Computer Networks, why would a developer use routing? (variation 76)
45. Which statement best describes IP addresses in Computer Networks?
46. Which statement best describes IP addresses in Computer Networks? (variation 100)
47. When working with Computer Networks, why would a developer use routing? (variation 96)
48. Which option is a correct use case for latency in Computer Networks? (variation 78)
49. Which statement best describes IP addresses in Computer Networks? (variation 70)
50. When working with Computer Networks, why would a developer use subnets? (variation 81)
51. Which option is a correct use case for latency in Computer Networks? (variation 98)
52. Which statement best describes HTTP in Computer Networks?
53. Which statement best describes HTTP in Computer Networks? (variation 95)
54. A student says 'DNS' is not relevant to real projects. What is the best correction? (variation 104)
55. When working with Computer Networks, why would a developer use routing? (variation 356)

56. A student says 'ports' is not relevant to real projects. What is the best correction? (variation 99)

57. Which option is a correct use case for UDP in Computer Networks?

58. When working with Computer Networks, why would a developer use subnets? (variation 71)

59. Which option is a correct use case for UDP in Computer Networks? (variation 103)

60. Which option is a correct use case for UDP in Computer Networks? (variation 93)
