

CBSE Previous Year Practice 2018 (2018)

Subject: General | Topic: Operating Systems

1. Which statement best describes file systems in Operating Systems?
2. What is the most accurate beginner-level explanation of context switching? (variation 92)
3. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
4. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
5. Which option is a correct use case for scheduling in Operating Systems?
6. Which statement best describes processes in Operating Systems? (variation 80)
7. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
8. When working with Operating Systems, why would a developer use threads? (variation 71)
9. When working with Operating Systems, why would a developer use threads? (variation 101)
10. What is the most accurate beginner-level explanation of context switching? (variation 72)
11. When working with Operating Systems, why would a developer use system calls? (variation 76)
12. What is the most accurate beginner-level explanation of context switching? (variation 352)
13. When working with Operating Systems, why would a developer use system calls? (variation 86)
14. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
15. When working with Operating Systems, why would a developer use system calls? (variation 106)
16. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
17. What is the most accurate beginner-level explanation of context switching? (variation 102)

18. Which statement best describes processes in Operating Systems? (variation 70)
19. A student says 'paging' is not relevant to real projects. What is the best correction?
20. Which statement best describes file systems in Operating Systems? (variation 105)
21. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
22. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
23. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
24. When working with Operating Systems, why would a developer use threads?
25. Which statement best describes processes in Operating Systems? (variation 350)
26. What is the most accurate beginner-level explanation of context switching?
27. When working with Operating Systems, why would a developer use threads? (variation 351)
28. Which statement best describes processes in Operating Systems?
29. Which statement best describes processes in Operating Systems? (variation 100)
30. When working with Operating Systems, why would a developer use system calls?
31. Which statement best describes file systems in Operating Systems? (variation 75)
32. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
33. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
34. Which statement best describes file systems in Operating Systems? (variation 355)
35. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
36. What is the most accurate beginner-level explanation of context switching? (variation 82)

37. When working with Operating Systems, why would a developer use system calls? (variation 96)
38. A student says 'mutexes' is not relevant to real projects. What is the best correction?
39. Which statement best describes file systems in Operating Systems? (variation 85)
40. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
41. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
42. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
43. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
44. When working with Operating Systems, why would a developer use threads? (variation 91)
45. When working with Operating Systems, why would a developer use threads? (variation 81)
46. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
47. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
48. Which statement best describes processes in Operating Systems? (variation 90)
49. When working with Operating Systems, why would a developer use system calls? (variation 356)
50. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
51. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
52. Which option is a correct use case for virtual memory in Operating Systems?
53. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
54. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
55. Which statement best describes file systems in Operating Systems? (variation 95)

56. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

57. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

58. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

59. What is the most accurate beginner-level explanation of deadlocks?

60. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
