

CBSE Previous Year Practice 2019 (2019)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use threads? (variation 101)
2. Which statement best describes processes in Operating Systems? (variation 80)
3. What is the most accurate beginner-level explanation of context switching? (variation 82)
4. When working with Operating Systems, why would a developer use threads? (variation 351)
5. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
6. Which option is a correct use case for scheduling in Operating Systems?
7. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
8. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
9. When working with Operating Systems, why would a developer use threads? (variation 71)
10. Which statement best describes file systems in Operating Systems? (variation 85)
11. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
12. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
13. What is the most accurate beginner-level explanation of context switching? (variation 102)
14. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
15. When working with Operating Systems, why would a developer use system calls?
16. What is the most accurate beginner-level explanation of context switching? (variation 352)
17. A student says 'paging' is not relevant to real projects. What is the best correction?

18. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
19. When working with Operating Systems, why would a developer use system calls? (variation 106)
20. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
21. When working with Operating Systems, why would a developer use system calls? (variation 96)
22. What is the most accurate beginner-level explanation of context switching? (variation 92)
23. What is the most accurate beginner-level explanation of deadlocks?
24. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
25. What is the most accurate beginner-level explanation of context switching? (variation 72)
26. What is the most accurate beginner-level explanation of context switching?
27. Which option is a correct use case for virtual memory in Operating Systems?
28. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
29. When working with Operating Systems, why would a developer use threads?
30. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
31. When working with Operating Systems, why would a developer use threads? (variation 91)
32. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
33. Which statement best describes file systems in Operating Systems? (variation 75)
34. Which statement best describes processes in Operating Systems? (variation 90)
35. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
36. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

37. Which statement best describes file systems in Operating Systems? (variation 105)
38. Which statement best describes processes in Operating Systems? (variation 100)
39. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
40. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
41. When working with Operating Systems, why would a developer use threads? (variation 81)
42. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
43. Which statement best describes file systems in Operating Systems? (variation 355)
44. When working with Operating Systems, why would a developer use system calls? (variation 86)
45. Which statement best describes processes in Operating Systems? (variation 70)
46. A student says 'mutexes' is not relevant to real projects. What is the best correction?
47. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
48. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
49. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
50. Which statement best describes processes in Operating Systems? (variation 350)
51. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
52. When working with Operating Systems, why would a developer use system calls? (variation 356)
53. Which statement best describes file systems in Operating Systems? (variation 95)
54. Which statement best describes processes in Operating Systems?
55. When working with Operating Systems, why would a developer use system calls? (variation 76)

56. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

57. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

58. Which statement best describes file systems in Operating Systems?

59. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

60. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
