

CBSE Previous Year Practice 2020 (2020)

Subject: General | Topic: Operating Systems

1. Which statement best describes processes in Operating Systems? (variation 70)
2. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
3. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
4. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
5. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
6. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
7. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
8. What is the most accurate beginner-level explanation of context switching?
9. When working with Operating Systems, why would a developer use system calls? (variation 356)
10. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
11. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
12. Which option is a correct use case for scheduling in Operating Systems?
13. Which statement best describes file systems in Operating Systems? (variation 95)
14. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
15. Which option is a correct use case for virtual memory in Operating Systems?
16. Which statement best describes file systems in Operating Systems? (variation 75)
17. When working with Operating Systems, why would a developer use threads? (variation 101)

18. A student says 'mutexes' is not relevant to real projects. What is the best correction?
19. When working with Operating Systems, why would a developer use threads?
20. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
21. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
22. Which statement best describes processes in Operating Systems? (variation 350)
23. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
24. When working with Operating Systems, why would a developer use system calls?
25. When working with Operating Systems, why would a developer use threads? (variation 91)
26. Which statement best describes file systems in Operating Systems?
27. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
28. Which statement best describes file systems in Operating Systems? (variation 85)
29. What is the most accurate beginner-level explanation of context switching? (variation 352)
30. Which statement best describes processes in Operating Systems? (variation 80)
31. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
32. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
33. When working with Operating Systems, why would a developer use system calls? (variation 76)
34. Which statement best describes processes in Operating Systems? (variation 90)
35. What is the most accurate beginner-level explanation of context switching? (variation 102)
36. What is the most accurate beginner-level explanation of context switching? (variation 82)

37. What is the most accurate beginner-level explanation of context switching? (variation 92)
38. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
39. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
40. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
41. Which statement best describes file systems in Operating Systems? (variation 105)
42. Which statement best describes processes in Operating Systems? (variation 100)
43. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
44. When working with Operating Systems, why would a developer use threads? (variation 351)
45. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
46. When working with Operating Systems, why would a developer use system calls? (variation 106)
47. Which statement best describes file systems in Operating Systems? (variation 355)
48. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
49. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
50. Which statement best describes processes in Operating Systems?
51. When working with Operating Systems, why would a developer use system calls? (variation 96)
52. What is the most accurate beginner-level explanation of context switching? (variation 72)
53. A student says 'paging' is not relevant to real projects. What is the best correction?
54. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
55. When working with Operating Systems, why would a developer use threads? (variation 71)

56. What is the most accurate beginner-level explanation of deadlocks?

57. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

58. When working with Operating Systems, why would a developer use system calls? (variation 86)

59. When working with Operating Systems, why would a developer use threads? (variation 81)

60. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
