

CBSE Previous Year Practice 2023 (2023)

Subject: General | Topic: Operating Systems

1. Which statement best describes file systems in Operating Systems? (variation 355)
2. When working with Operating Systems, why would a developer use threads? (variation 91)
3. Which statement best describes file systems in Operating Systems? (variation 75)
4. When working with Operating Systems, why would a developer use threads?
5. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
6. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
7. Which statement best describes processes in Operating Systems? (variation 70)
8. When working with Operating Systems, why would a developer use system calls? (variation 96)
9. When working with Operating Systems, why would a developer use threads? (variation 81)
10. Which statement best describes file systems in Operating Systems? (variation 105)
11. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
12. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
13. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
14. A student says 'paging' is not relevant to real projects. What is the best correction?
15. Which option is a correct use case for scheduling in Operating Systems?
16. A student says 'mutexes' is not relevant to real projects. What is the best correction?
17. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

18. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
19. When working with Operating Systems, why would a developer use system calls?
20. Which statement best describes file systems in Operating Systems? (variation 85)
21. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
22. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
23. What is the most accurate beginner-level explanation of context switching? (variation 72)
24. When working with Operating Systems, why would a developer use system calls? (variation 106)
25. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
26. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
27. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
28. What is the most accurate beginner-level explanation of context switching?
29. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
30. What is the most accurate beginner-level explanation of context switching? (variation 92)
31. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
32. What is the most accurate beginner-level explanation of deadlocks?
33. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
34. Which statement best describes processes in Operating Systems? (variation 350)
35. When working with Operating Systems, why would a developer use system calls? (variation 76)
36. Which statement best describes processes in Operating Systems? (variation 100)

37. When working with Operating Systems, why would a developer use threads? (variation 101)
38. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
39. What is the most accurate beginner-level explanation of context switching? (variation 352)
40. What is the most accurate beginner-level explanation of context switching? (variation 102)
41. Which statement best describes processes in Operating Systems?
42. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
43. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
44. Which statement best describes processes in Operating Systems? (variation 90)
45. When working with Operating Systems, why would a developer use threads? (variation 71)
46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
47. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
48. Which option is a correct use case for virtual memory in Operating Systems?
49. What is the most accurate beginner-level explanation of context switching? (variation 82)
50. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
51. When working with Operating Systems, why would a developer use system calls? (variation 356)
52. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
53. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
54. Which statement best describes file systems in Operating Systems?
55. Which statement best describes file systems in Operating Systems? (variation 95)

56. When working with Operating Systems, why would a developer use threads? (variation 351)

57. Which statement best describes processes in Operating Systems? (variation 80)

58. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

59. When working with Operating Systems, why would a developer use system calls? (variation 86)

60. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
