

ICSE Previous Year Practice 2017 (2017)

Subject: General | Topic: Operating Systems

1. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
2. When working with Operating Systems, why would a developer use threads? (variation 91)
3. Which statement best describes processes in Operating Systems? (variation 80)
4. Which statement best describes file systems in Operating Systems? (variation 105)
5. When working with Operating Systems, why would a developer use threads? (variation 71)
6. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
7. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
8. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
9. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
10. Which statement best describes processes in Operating Systems? (variation 350)
11. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
12. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
13. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
14. What is the most accurate beginner-level explanation of context switching? (variation 102)
15. Which option is a correct use case for virtual memory in Operating Systems?
16. A student says 'mutexes' is not relevant to real projects. What is the best correction?
17. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

18. Which statement best describes processes in Operating Systems?
19. When working with Operating Systems, why would a developer use system calls? (variation 356)
20. When working with Operating Systems, why would a developer use threads? (variation 81)
21. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
22. When working with Operating Systems, why would a developer use threads? (variation 101)
23. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
24. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
25. Which statement best describes file systems in Operating Systems? (variation 75)
26. What is the most accurate beginner-level explanation of context switching? (variation 92)
27. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
28. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
29. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
30. What is the most accurate beginner-level explanation of context switching? (variation 82)
31. When working with Operating Systems, why would a developer use system calls? (variation 96)
32. Which statement best describes file systems in Operating Systems? (variation 95)
33. When working with Operating Systems, why would a developer use threads? (variation 351)
34. Which statement best describes processes in Operating Systems? (variation 70)
35. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
36. When working with Operating Systems, why would a developer use threads?

37. Which statement best describes file systems in Operating Systems?
38. Which statement best describes file systems in Operating Systems? (variation 355)
39. Which statement best describes processes in Operating Systems? (variation 90)
40. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
41. What is the most accurate beginner-level explanation of context switching? (variation 352)
42. When working with Operating Systems, why would a developer use system calls? (variation 86)
43. What is the most accurate beginner-level explanation of context switching? (variation 72)
44. When working with Operating Systems, why would a developer use system calls? (variation 106)
45. What is the most accurate beginner-level explanation of deadlocks?
46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
47. When working with Operating Systems, why would a developer use system calls? (variation 76)
48. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
49. What is the most accurate beginner-level explanation of context switching?
50. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
51. A student says 'paging' is not relevant to real projects. What is the best correction?
52. When working with Operating Systems, why would a developer use system calls?
53. Which statement best describes file systems in Operating Systems? (variation 85)
54. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
55. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

56. Which statement best describes processes in Operating Systems? (variation 100)
57. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
58. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
59. Which option is a correct use case for scheduling in Operating Systems?
60. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
