

ICSE Previous Year Practice 2019 (2019)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
2. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
3. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
4. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
5. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
6. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
7. Which statement best describes file systems in Operating Systems?
8. When working with Operating Systems, why would a developer use threads? (variation 81)
9. Which statement best describes processes in Operating Systems? (variation 100)
10. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
11. A student says 'paging' is not relevant to real projects. What is the best correction?
12. What is the most accurate beginner-level explanation of deadlocks?
13. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
14. What is the most accurate beginner-level explanation of context switching? (variation 82)
15. When working with Operating Systems, why would a developer use system calls?
16. What is the most accurate beginner-level explanation of context switching? (variation 72)
17. Which statement best describes processes in Operating Systems? (variation 70)

18. Which statement best describes processes in Operating Systems? (variation 80)
19. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
20. When working with Operating Systems, why would a developer use threads? (variation 91)
21. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
22. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
23. What is the most accurate beginner-level explanation of context switching? (variation 102)
24. Which statement best describes file systems in Operating Systems? (variation 95)
25. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
26. What is the most accurate beginner-level explanation of context switching?
27. When working with Operating Systems, why would a developer use system calls? (variation 86)
28. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
29. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
30. Which statement best describes file systems in Operating Systems? (variation 85)
31. When working with Operating Systems, why would a developer use threads? (variation 351)
32. When working with Operating Systems, why would a developer use threads?
33. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
34. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
35. Which option is a correct use case for virtual memory in Operating Systems?
36. Which statement best describes processes in Operating Systems? (variation 90)

37. What is the most accurate beginner-level explanation of context switching? (variation 352)
38. A student says 'mutexes' is not relevant to real projects. What is the best correction?
39. Which statement best describes file systems in Operating Systems? (variation 355)
40. Which statement best describes file systems in Operating Systems? (variation 105)
41. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
42. Which statement best describes file systems in Operating Systems? (variation 75)
43. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
44. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
45. When working with Operating Systems, why would a developer use system calls? (variation 96)
46. What is the most accurate beginner-level explanation of context switching? (variation 92)
47. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
48. When working with Operating Systems, why would a developer use system calls? (variation 356)
49. Which option is a correct use case for scheduling in Operating Systems?
50. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
51. When working with Operating Systems, why would a developer use threads? (variation 71)
52. Which statement best describes processes in Operating Systems?
53. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
54. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
55. When working with Operating Systems, why would a developer use system calls? (variation 76)

56. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

57. When working with Operating Systems, why would a developer use threads? (variation 101)

58. When working with Operating Systems, why would a developer use system calls? (variation 106)

59. Which statement best describes processes in Operating Systems? (variation 350)

60. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
