

ICSE Previous Year Practice 2020 (2020)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
2. Which statement best describes file systems in Operating Systems? (variation 85)
3. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
4. Which statement best describes file systems in Operating Systems? (variation 355)
5. Which statement best describes processes in Operating Systems? (variation 90)
6. Which statement best describes processes in Operating Systems? (variation 350)
7. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
8. When working with Operating Systems, why would a developer use system calls? (variation 76)
9. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
10. When working with Operating Systems, why would a developer use threads? (variation 101)
11. Which statement best describes processes in Operating Systems?
12. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
13. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
14. Which statement best describes file systems in Operating Systems? (variation 75)
15. Which statement best describes processes in Operating Systems? (variation 80)
16. What is the most accurate beginner-level explanation of deadlocks?
17. What is the most accurate beginner-level explanation of context switching? (variation 72)

18. When working with Operating Systems, why would a developer use threads? (variation 91)
19. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
20. When working with Operating Systems, why would a developer use threads? (variation 71)
21. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
22. Which option is a correct use case for scheduling in Operating Systems?
23. What is the most accurate beginner-level explanation of context switching? (variation 82)
24. Which statement best describes file systems in Operating Systems?
25. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
26. What is the most accurate beginner-level explanation of context switching?
27. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
28. Which option is a correct use case for virtual memory in Operating Systems?
29. Which statement best describes file systems in Operating Systems? (variation 105)
30. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
31. When working with Operating Systems, why would a developer use system calls? (variation 356)
32. Which statement best describes processes in Operating Systems? (variation 70)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
34. When working with Operating Systems, why would a developer use system calls? (variation 86)
35. A student says 'paging' is not relevant to real projects. What is the best correction?
36. When working with Operating Systems, why would a developer use threads? (variation 81)

37. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
38. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
39. What is the most accurate beginner-level explanation of context switching? (variation 102)
40. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
41. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
42. Which statement best describes processes in Operating Systems? (variation 100)
43. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
44. When working with Operating Systems, why would a developer use system calls? (variation 96)
45. Which statement best describes file systems in Operating Systems? (variation 95)
46. When working with Operating Systems, why would a developer use threads? (variation 351)
47. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
48. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
49. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
50. When working with Operating Systems, why would a developer use threads?
51. What is the most accurate beginner-level explanation of context switching? (variation 352)
52. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
53. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
54. A student says 'mutexes' is not relevant to real projects. What is the best correction?
55. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

56. When working with Operating Systems, why would a developer use system calls? (variation 106)

57. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

58. What is the most accurate beginner-level explanation of context switching? (variation 92)

59. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

60. When working with Operating Systems, why would a developer use system calls?
