

ICSE Previous Year Practice 2021 (2021)

Subject: General | Topic: Operating Systems

1. What is the most accurate beginner-level explanation of context switching?
2. What is the most accurate beginner-level explanation of deadlocks?
3. When working with Operating Systems, why would a developer use threads? (variation 81)
4. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
5. Which statement best describes processes in Operating Systems? (variation 70)
6. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
7. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
8. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
9. When working with Operating Systems, why would a developer use system calls? (variation 76)
10. Which statement best describes file systems in Operating Systems?
11. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
12. When working with Operating Systems, why would a developer use threads? (variation 101)
13. What is the most accurate beginner-level explanation of context switching? (variation 102)
14. When working with Operating Systems, why would a developer use system calls? (variation 106)
15. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
16. When working with Operating Systems, why would a developer use system calls? (variation 356)
17. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

18. When working with Operating Systems, why would a developer use threads? (variation 91)
19. Which statement best describes processes in Operating Systems? (variation 80)
20. When working with Operating Systems, why would a developer use system calls? (variation 86)
21. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
22. Which statement best describes processes in Operating Systems? (variation 350)
23. What is the most accurate beginner-level explanation of context switching? (variation 72)
24. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
25. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
26. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
27. When working with Operating Systems, why would a developer use threads? (variation 351)
28. When working with Operating Systems, why would a developer use threads? (variation 71)
29. Which statement best describes file systems in Operating Systems? (variation 105)
30. Which option is a correct use case for virtual memory in Operating Systems?
31. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
32. Which statement best describes file systems in Operating Systems? (variation 85)
33. What is the most accurate beginner-level explanation of context switching? (variation 92)
34. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
35. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
36. Which statement best describes processes in Operating Systems? (variation 100)

37. What is the most accurate beginner-level explanation of context switching? (variation 352)
38. When working with Operating Systems, why would a developer use system calls? (variation 96)
39. Which statement best describes file systems in Operating Systems? (variation 95)
40. What is the most accurate beginner-level explanation of context switching? (variation 82)
41. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
42. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
43. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
44. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
45. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
46. Which statement best describes file systems in Operating Systems? (variation 75)
47. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
48. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
49. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
50. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
51. Which option is a correct use case for scheduling in Operating Systems?
52. Which statement best describes processes in Operating Systems? (variation 90)
53. When working with Operating Systems, why would a developer use system calls?
54. When working with Operating Systems, why would a developer use threads?
55. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

56. Which statement best describes file systems in Operating Systems? (variation 355)

57. A student says 'paging' is not relevant to real projects. What is the best correction?

58. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

59. Which statement best describes processes in Operating Systems?

60. A student says 'mutexes' is not relevant to real projects. What is the best correction?
