

ICSE Previous Year Practice 2023 (2023)

Subject: General | Topic: Operating Systems

1. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
2. What is the most accurate beginner-level explanation of context switching? (variation 92)
3. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
4. When working with Operating Systems, why would a developer use system calls? (variation 106)
5. When working with Operating Systems, why would a developer use system calls? (variation 356)
6. Which statement best describes file systems in Operating Systems? (variation 105)
7. When working with Operating Systems, why would a developer use threads? (variation 71)
8. Which statement best describes processes in Operating Systems? (variation 90)
9. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
10. What is the most accurate beginner-level explanation of deadlocks?
11. What is the most accurate beginner-level explanation of context switching? (variation 352)
12. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
13. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
14. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
15. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
16. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
17. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

18. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
19. Which statement best describes processes in Operating Systems? (variation 80)
20. What is the most accurate beginner-level explanation of context switching? (variation 82)
21. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
22. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
23. What is the most accurate beginner-level explanation of context switching? (variation 72)
24. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
25. Which statement best describes processes in Operating Systems? (variation 100)
26. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
27. Which statement best describes file systems in Operating Systems? (variation 75)
28. When working with Operating Systems, why would a developer use system calls? (variation 96)
29. Which statement best describes processes in Operating Systems? (variation 70)
30. Which statement best describes file systems in Operating Systems? (variation 95)
31. When working with Operating Systems, why would a developer use threads? (variation 101)
32. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
34. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
35. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
36. When working with Operating Systems, why would a developer use system calls?

37. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
38. A student says 'paging' is not relevant to real projects. What is the best correction?
39. Which option is a correct use case for virtual memory in Operating Systems?
40. What is the most accurate beginner-level explanation of context switching? (variation 102)
41. When working with Operating Systems, why would a developer use system calls? (variation 86)
42. Which statement best describes processes in Operating Systems?
43. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
44. When working with Operating Systems, why would a developer use threads? (variation 81)
45. A student says 'mutexes' is not relevant to real projects. What is the best correction?
46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
47. Which statement best describes file systems in Operating Systems? (variation 85)
48. When working with Operating Systems, why would a developer use threads? (variation 351)
49. When working with Operating Systems, why would a developer use system calls? (variation 76)
50. Which statement best describes file systems in Operating Systems? (variation 355)
51. Which option is a correct use case for scheduling in Operating Systems?
52. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
53. When working with Operating Systems, why would a developer use threads? (variation 91)
54. Which statement best describes file systems in Operating Systems?
55. When working with Operating Systems, why would a developer use threads?

56. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

57. Which statement best describes processes in Operating Systems? (variation 350)

58. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

59. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

60. What is the most accurate beginner-level explanation of context switching?
