

ICSE Previous Year Practice 2024 (2024)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use threads? (variation 71)
2. What is the most accurate beginner-level explanation of context switching? (variation 92)
3. When working with Operating Systems, why would a developer use system calls? (variation 356)
4. When working with Operating Systems, why would a developer use system calls? (variation 106)
5. Which option is a correct use case for virtual memory in Operating Systems?
6. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
7. When working with Operating Systems, why would a developer use system calls? (variation 86)
8. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
9. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
10. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
11. When working with Operating Systems, why would a developer use system calls? (variation 76)
12. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
13. What is the most accurate beginner-level explanation of context switching? (variation 72)
14. Which statement best describes file systems in Operating Systems? (variation 105)
15. Which statement best describes processes in Operating Systems? (variation 90)
16. What is the most accurate beginner-level explanation of context switching? (variation 352)
17. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

18. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
19. When working with Operating Systems, why would a developer use threads? (variation 101)
20. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
21. Which statement best describes processes in Operating Systems? (variation 80)
22. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
23. Which statement best describes processes in Operating Systems?
24. When working with Operating Systems, why would a developer use threads? (variation 81)
25. A student says 'mutexes' is not relevant to real projects. What is the best correction?
26. When working with Operating Systems, why would a developer use system calls?
27. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
28. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
29. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
30. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
31. What is the most accurate beginner-level explanation of context switching?
32. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
33. When working with Operating Systems, why would a developer use threads? (variation 351)
34. Which statement best describes file systems in Operating Systems? (variation 95)
35. When working with Operating Systems, why would a developer use threads?
36. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

37. Which statement best describes file systems in Operating Systems? (variation 75)
38. Which statement best describes file systems in Operating Systems?
39. What is the most accurate beginner-level explanation of context switching? (variation 82)
40. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
41. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
42. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
43. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
44. Which statement best describes file systems in Operating Systems? (variation 355)
45. Which statement best describes file systems in Operating Systems? (variation 85)
46. Which statement best describes processes in Operating Systems? (variation 70)
47. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
48. A student says 'paging' is not relevant to real projects. What is the best correction?
49. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
50. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
51. When working with Operating Systems, why would a developer use system calls? (variation 96)
52. Which statement best describes processes in Operating Systems? (variation 100)
53. What is the most accurate beginner-level explanation of deadlocks?
54. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
55. Which statement best describes processes in Operating Systems? (variation 350)

56. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

57. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

58. What is the most accurate beginner-level explanation of context switching? (variation 102)

59. When working with Operating Systems, why would a developer use threads? (variation 91)

60. Which option is a correct use case for scheduling in Operating Systems?
