

# ICSE Previous Year Practice 2026 (2026)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use system calls? (variation 356)
2. What is the most accurate beginner-level explanation of context switching? (variation 72)
3. When working with Operating Systems, why would a developer use system calls? (variation 76)
4. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
5. Which option is a correct use case for virtual memory in Operating Systems?
6. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
7. When working with Operating Systems, why would a developer use system calls? (variation 106)
8. A student says 'paging' is not relevant to real projects. What is the best correction?
9. Which statement best describes file systems in Operating Systems? (variation 85)
10. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
11. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
12. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
13. A student says 'mutexes' is not relevant to real projects. What is the best correction?
14. Which statement best describes file systems in Operating Systems?
15. When working with Operating Systems, why would a developer use threads? (variation 351)
16. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
17. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

18. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
19. Which statement best describes processes in Operating Systems? (variation 350)
20. What is the most accurate beginner-level explanation of context switching? (variation 352)
21. Which statement best describes file systems in Operating Systems? (variation 95)
22. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
23. Which statement best describes file systems in Operating Systems? (variation 105)
24. When working with Operating Systems, why would a developer use threads? (variation 91)
25. When working with Operating Systems, why would a developer use system calls?
26. When working with Operating Systems, why would a developer use threads?
27. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
28. When working with Operating Systems, why would a developer use system calls? (variation 96)
29. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
30. What is the most accurate beginner-level explanation of deadlocks?
31. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
32. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
33. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
34. Which statement best describes file systems in Operating Systems? (variation 355)
35. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
36. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

37. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
38. Which statement best describes processes in Operating Systems? (variation 80)
39. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
40. When working with Operating Systems, why would a developer use system calls? (variation 86)
41. What is the most accurate beginner-level explanation of context switching? (variation 92)
42. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
43. Which statement best describes processes in Operating Systems? (variation 70)
44. Which statement best describes processes in Operating Systems? (variation 90)
45. When working with Operating Systems, why would a developer use threads? (variation 81)
46. What is the most accurate beginner-level explanation of context switching?
47. What is the most accurate beginner-level explanation of context switching? (variation 102)
48. When working with Operating Systems, why would a developer use threads? (variation 71)
49. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
50. What is the most accurate beginner-level explanation of context switching? (variation 82)
51. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
52. Which statement best describes file systems in Operating Systems? (variation 75)
53. Which statement best describes processes in Operating Systems? (variation 100)
54. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
55. Which statement best describes processes in Operating Systems?

56. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

57. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

58. Which option is a correct use case for scheduling in Operating Systems?

59. When working with Operating Systems, why would a developer use threads? (variation 101)

60. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
