

State Board Previous Year Practice 2017 (2017)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
2. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
3. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
4. Which option is a correct use case for scheduling in Operating Systems?
5. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
6. Which statement best describes processes in Operating Systems? (variation 350)
7. Which statement best describes file systems in Operating Systems? (variation 95)
8. When working with Operating Systems, why would a developer use threads? (variation 71)
9. When working with Operating Systems, why would a developer use system calls? (variation 76)
10. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
11. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
12. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
13. Which statement best describes processes in Operating Systems? (variation 100)
14. When working with Operating Systems, why would a developer use system calls? (variation 86)
15. What is the most accurate beginner-level explanation of context switching? (variation 352)
16. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
17. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

18. When working with Operating Systems, why would a developer use threads? (variation 101)
19. Which statement best describes file systems in Operating Systems? (variation 75)
20. A student says 'mutexes' is not relevant to real projects. What is the best correction?
21. When working with Operating Systems, why would a developer use threads? (variation 81)
22. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
23. What is the most accurate beginner-level explanation of context switching? (variation 102)
24. Which statement best describes file systems in Operating Systems?
25. When working with Operating Systems, why would a developer use threads? (variation 91)
26. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
27. When working with Operating Systems, why would a developer use system calls? (variation 106)
28. Which statement best describes file systems in Operating Systems? (variation 85)
29. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
30. What is the most accurate beginner-level explanation of deadlocks?
31. Which option is a correct use case for virtual memory in Operating Systems?
32. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
34. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
35. When working with Operating Systems, why would a developer use system calls?
36. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

37. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
38. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
39. Which statement best describes processes in Operating Systems? (variation 90)
40. What is the most accurate beginner-level explanation of context switching? (variation 82)
41. When working with Operating Systems, why would a developer use threads? (variation 351)
42. When working with Operating Systems, why would a developer use system calls? (variation 356)
43. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
44. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
45. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
47. A student says 'paging' is not relevant to real projects. What is the best correction?
48. Which statement best describes processes in Operating Systems?
49. What is the most accurate beginner-level explanation of context switching? (variation 72)
50. What is the most accurate beginner-level explanation of context switching? (variation 92)
51. Which statement best describes file systems in Operating Systems? (variation 355)
52. Which statement best describes processes in Operating Systems? (variation 70)
53. When working with Operating Systems, why would a developer use threads?
54. What is the most accurate beginner-level explanation of context switching?
55. When working with Operating Systems, why would a developer use system calls? (variation 96)

56. Which statement best describes file systems in Operating Systems? (variation 105)

57. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

58. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

59. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

60. Which statement best describes processes in Operating Systems? (variation 80)
