

State Board Previous Year Practice 2019 (2019)

Subject: General | Topic: Operating Systems

1. What is the most accurate beginner-level explanation of context switching? (variation 352)
2. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
3. Which statement best describes processes in Operating Systems? (variation 80)
4. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
5. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
6. When working with Operating Systems, why would a developer use threads?
7. Which statement best describes file systems in Operating Systems? (variation 75)
8. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
9. What is the most accurate beginner-level explanation of context switching?
10. When working with Operating Systems, why would a developer use threads? (variation 81)
11. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
12. Which option is a correct use case for virtual memory in Operating Systems?
13. When working with Operating Systems, why would a developer use system calls? (variation 96)
14. Which statement best describes processes in Operating Systems?
15. Which statement best describes file systems in Operating Systems? (variation 95)
16. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
17. When working with Operating Systems, why would a developer use threads? (variation 91)

18. What is the most accurate beginner-level explanation of context switching? (variation 82)
19. When working with Operating Systems, why would a developer use system calls? (variation 86)
20. When working with Operating Systems, why would a developer use system calls?
21. When working with Operating Systems, why would a developer use threads? (variation 351)
22. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
23. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
24. Which statement best describes file systems in Operating Systems? (variation 85)
25. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
26. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
27. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
28. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
29. A student says 'paging' is not relevant to real projects. What is the best correction?
30. What is the most accurate beginner-level explanation of context switching? (variation 102)
31. When working with Operating Systems, why would a developer use system calls? (variation 356)
32. Which statement best describes processes in Operating Systems? (variation 70)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
34. Which option is a correct use case for scheduling in Operating Systems?
35. When working with Operating Systems, why would a developer use threads? (variation 71)
36. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

37. Which statement best describes file systems in Operating Systems? (variation 355)
38. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
39. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
40. What is the most accurate beginner-level explanation of deadlocks?
41. When working with Operating Systems, why would a developer use threads? (variation 101)
42. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
43. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
44. Which statement best describes file systems in Operating Systems?
45. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
47. Which statement best describes processes in Operating Systems? (variation 350)
48. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
49. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
50. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
51. Which statement best describes file systems in Operating Systems? (variation 105)
52. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
53. When working with Operating Systems, why would a developer use system calls? (variation 76)
54. A student says 'mutexes' is not relevant to real projects. What is the best correction?
55. When working with Operating Systems, why would a developer use system calls? (variation 106)

56. What is the most accurate beginner-level explanation of context switching? (variation 72)

57. What is the most accurate beginner-level explanation of context switching? (variation 92)

58. Which statement best describes processes in Operating Systems? (variation 90)

59. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

60. Which statement best describes processes in Operating Systems? (variation 100)
