

State Board Previous Year Practice 2024 (2024)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
2. When working with Operating Systems, why would a developer use threads? (variation 81)
3. When working with Operating Systems, why would a developer use system calls? (variation 86)
4. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
5. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
6. Which option is a correct use case for virtual memory in Operating Systems?
7. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
8. When working with Operating Systems, why would a developer use system calls? (variation 96)
9. When working with Operating Systems, why would a developer use threads? (variation 351)
10. Which statement best describes file systems in Operating Systems? (variation 95)
11. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
12. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
13. When working with Operating Systems, why would a developer use threads? (variation 91)
14. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
15. What is the most accurate beginner-level explanation of context switching? (variation 72)
16. What is the most accurate beginner-level explanation of context switching?
17. Which statement best describes file systems in Operating Systems? (variation 75)

18. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
19. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
20. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
21. Which statement best describes processes in Operating Systems? (variation 80)
22. When working with Operating Systems, why would a developer use threads? (variation 71)
23. Which statement best describes processes in Operating Systems? (variation 70)
24. Which statement best describes file systems in Operating Systems?
25. When working with Operating Systems, why would a developer use system calls?
26. When working with Operating Systems, why would a developer use threads?
27. A student says 'paging' is not relevant to real projects. What is the best correction?
28. Which statement best describes processes in Operating Systems? (variation 100)
29. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
30. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
31. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
32. What is the most accurate beginner-level explanation of context switching? (variation 92)
33. Which statement best describes file systems in Operating Systems? (variation 85)
34. Which option is a correct use case for scheduling in Operating Systems?
35. What is the most accurate beginner-level explanation of deadlocks?
36. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

37. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
38. Which statement best describes processes in Operating Systems?
39. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
40. Which statement best describes processes in Operating Systems? (variation 350)
41. What is the most accurate beginner-level explanation of context switching? (variation 82)
42. When working with Operating Systems, why would a developer use threads? (variation 101)
43. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
44. Which statement best describes processes in Operating Systems? (variation 90)
45. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
47. A student says 'mutexes' is not relevant to real projects. What is the best correction?
48. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
49. What is the most accurate beginner-level explanation of context switching? (variation 352)
50. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
51. When working with Operating Systems, why would a developer use system calls? (variation 356)
52. When working with Operating Systems, why would a developer use system calls? (variation 76)
53. Which statement best describes file systems in Operating Systems? (variation 105)
54. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
55. When working with Operating Systems, why would a developer use system calls? (variation 106)

56. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

57. Which statement best describes file systems in Operating Systems? (variation 355)

58. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

59. What is the most accurate beginner-level explanation of context switching? (variation 102)

60. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
