

State Board Previous Year Practice 2025 (2025)

Subject: General | Topic: Operating Systems

1. Which statement best describes file systems in Operating Systems?
2. When working with Operating Systems, why would a developer use threads? (variation 351)
3. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
4. Which option is a correct use case for scheduling in Operating Systems?
5. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
6. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
7. Which statement best describes processes in Operating Systems? (variation 350)
8. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
9. Which statement best describes file systems in Operating Systems? (variation 75)
10. When working with Operating Systems, why would a developer use system calls? (variation 96)
11. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
12. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
13. Which statement best describes processes in Operating Systems? (variation 70)
14. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
15. When working with Operating Systems, why would a developer use system calls? (variation 356)
16. What is the most accurate beginner-level explanation of deadlocks?
17. A student says 'paging' is not relevant to real projects. What is the best correction?

18. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
19. Which statement best describes processes in Operating Systems? (variation 100)
20. What is the most accurate beginner-level explanation of context switching?
21. Which statement best describes file systems in Operating Systems? (variation 355)
22. When working with Operating Systems, why would a developer use system calls? (variation 106)
23. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
24. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
25. When working with Operating Systems, why would a developer use threads?
26. What is the most accurate beginner-level explanation of context switching? (variation 352)
27. When working with Operating Systems, why would a developer use threads? (variation 101)
28. When working with Operating Systems, why would a developer use threads? (variation 71)
29. Which statement best describes processes in Operating Systems? (variation 90)
30. Which statement best describes file systems in Operating Systems? (variation 105)
31. When working with Operating Systems, why would a developer use threads? (variation 81)
32. Which option is a correct use case for virtual memory in Operating Systems?
33. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
34. What is the most accurate beginner-level explanation of context switching? (variation 72)
35. What is the most accurate beginner-level explanation of context switching? (variation 102)
36. Which option is a correct use case for scheduling in Operating Systems? (variation 78)

37. When working with Operating Systems, why would a developer use system calls? (variation 86)
38. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
39. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
40. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
41. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
42. Which statement best describes processes in Operating Systems? (variation 80)
43. Which statement best describes file systems in Operating Systems? (variation 95)
44. What is the most accurate beginner-level explanation of context switching? (variation 92)
45. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
46. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
47. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
48. When working with Operating Systems, why would a developer use system calls?
49. When working with Operating Systems, why would a developer use system calls? (variation 76)
50. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
51. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
52. What is the most accurate beginner-level explanation of context switching? (variation 82)
53. Which statement best describes file systems in Operating Systems? (variation 85)
54. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
55. Which statement best describes processes in Operating Systems?

56. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

57. When working with Operating Systems, why would a developer use threads? (variation 91)

58. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

59. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

60. A student says 'mutexes' is not relevant to real projects. What is the best correction?
