

IIT-JEE Previous Year Practice 2017 (2017)

Subject: General | Topic: Operating Systems

1. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
2. When working with Operating Systems, why would a developer use threads? (variation 351)
3. When working with Operating Systems, why would a developer use system calls? (variation 356)
4. Which statement best describes file systems in Operating Systems? (variation 75)
5. Which statement best describes processes in Operating Systems? (variation 90)
6. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
7. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
8. When working with Operating Systems, why would a developer use system calls? (variation 96)
9. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
10. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
11. Which statement best describes processes in Operating Systems?
12. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
13. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
14. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
15. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
16. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
17. Which statement best describes file systems in Operating Systems? (variation 355)

18. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
19. A student says 'mutexes' is not relevant to real projects. What is the best correction?
20. Which statement best describes file systems in Operating Systems? (variation 85)
21. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
22. When working with Operating Systems, why would a developer use system calls?
23. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
24. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
25. A student says 'paging' is not relevant to real projects. What is the best correction?
26. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
27. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
28. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
29. When working with Operating Systems, why would a developer use threads?
30. When working with Operating Systems, why would a developer use system calls? (variation 86)
31. When working with Operating Systems, why would a developer use system calls? (variation 76)
32. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
33. Which option is a correct use case for scheduling in Operating Systems?
34. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
35. What is the most accurate beginner-level explanation of context switching? (variation 352)
36. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

37. What is the most accurate beginner-level explanation of context switching?
38. When working with Operating Systems, why would a developer use threads? (variation 101)
39. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
40. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
41. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
42. What is the most accurate beginner-level explanation of context switching? (variation 92)
43. When working with Operating Systems, why would a developer use threads? (variation 71)
44. Which option is a correct use case for virtual memory in Operating Systems?
45. What is the most accurate beginner-level explanation of context switching? (variation 102)
46. What is the most accurate beginner-level explanation of deadlocks?
47. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
48. When working with Operating Systems, why would a developer use threads? (variation 91)
49. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
50. What is the most accurate beginner-level explanation of context switching? (variation 72)
51. Which statement best describes processes in Operating Systems? (variation 80)
52. Which statement best describes file systems in Operating Systems? (variation 95)
53. When working with Operating Systems, why would a developer use threads? (variation 81)
54. Which statement best describes processes in Operating Systems? (variation 100)
55. Which statement best describes processes in Operating Systems? (variation 350)

56. Which statement best describes file systems in Operating Systems?

57. Which statement best describes file systems in Operating Systems? (variation 105)

58. What is the most accurate beginner-level explanation of context switching? (variation 82)

59. Which statement best describes processes in Operating Systems? (variation 70)

60. When working with Operating Systems, why would a developer use system calls? (variation 106)
