

IIT-JEE Previous Year Practice 2018 (2018)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
2. What is the most accurate beginner-level explanation of context switching? (variation 102)
3. When working with Operating Systems, why would a developer use system calls? (variation 86)
4. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
5. Which statement best describes processes in Operating Systems? (variation 100)
6. When working with Operating Systems, why would a developer use threads? (variation 101)
7. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
8. When working with Operating Systems, why would a developer use threads? (variation 71)
9. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
10. What is the most accurate beginner-level explanation of context switching? (variation 352)
11. When working with Operating Systems, why would a developer use threads? (variation 351)
12. Which option is a correct use case for scheduling in Operating Systems?
13. A student says 'paging' is not relevant to real projects. What is the best correction?
14. A student says 'mutexes' is not relevant to real projects. What is the best correction?
15. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
16. When working with Operating Systems, why would a developer use system calls?
17. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

18. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
19. What is the most accurate beginner-level explanation of context switching?
20. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
21. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
22. Which statement best describes file systems in Operating Systems? (variation 75)
23. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
24. Which statement best describes file systems in Operating Systems? (variation 105)
25. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
26. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
27. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
28. Which statement best describes file systems in Operating Systems? (variation 355)
29. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
30. When working with Operating Systems, why would a developer use system calls? (variation 96)
31. When working with Operating Systems, why would a developer use system calls? (variation 106)
32. When working with Operating Systems, why would a developer use threads?
33. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
34. What is the most accurate beginner-level explanation of context switching? (variation 72)
35. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
36. Which statement best describes processes in Operating Systems? (variation 90)

37. Which statement best describes processes in Operating Systems?
38. Which statement best describes processes in Operating Systems? (variation 70)
39. Which statement best describes processes in Operating Systems? (variation 80)
40. Which statement best describes file systems in Operating Systems? (variation 85)
41. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
42. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
43. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
44. Which statement best describes file systems in Operating Systems?
45. When working with Operating Systems, why would a developer use system calls? (variation 356)
46. Which option is a correct use case for virtual memory in Operating Systems?
47. Which statement best describes file systems in Operating Systems? (variation 95)
48. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
49. Which statement best describes processes in Operating Systems? (variation 350)
50. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
51. What is the most accurate beginner-level explanation of context switching? (variation 82)
52. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
53. When working with Operating Systems, why would a developer use system calls? (variation 76)
54. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
55. When working with Operating Systems, why would a developer use threads? (variation 91)

56. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

57. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

58. What is the most accurate beginner-level explanation of context switching? (variation 92)

59. When working with Operating Systems, why would a developer use threads? (variation 81)

60. What is the most accurate beginner-level explanation of deadlocks?
