

IIT-JEE Previous Year Practice 2021 (2021)

Subject: General | Topic: Operating Systems

1. What is the most accurate beginner-level explanation of context switching? (variation 102)
2. When working with Operating Systems, why would a developer use system calls?
3. What is the most accurate beginner-level explanation of context switching?
4. What is the most accurate beginner-level explanation of context switching? (variation 92)
5. What is the most accurate beginner-level explanation of context switching? (variation 352)
6. Which option is a correct use case for virtual memory in Operating Systems?
7. When working with Operating Systems, why would a developer use system calls? (variation 356)
8. Which statement best describes processes in Operating Systems? (variation 100)
9. Which statement best describes file systems in Operating Systems? (variation 355)
10. Which statement best describes processes in Operating Systems?
11. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
12. Which statement best describes file systems in Operating Systems?
13. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
14. Which statement best describes file systems in Operating Systems? (variation 105)
15. Which statement best describes processes in Operating Systems? (variation 80)
16. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
17. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

18. When working with Operating Systems, why would a developer use threads? (variation 81)
19. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
20. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
21. A student says 'paging' is not relevant to real projects. What is the best correction?
22. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
23. What is the most accurate beginner-level explanation of context switching? (variation 72)
24. When working with Operating Systems, why would a developer use system calls? (variation 86)
25. A student says 'mutexes' is not relevant to real projects. What is the best correction?
26. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
27. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
28. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
29. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
30. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
31. When working with Operating Systems, why would a developer use threads? (variation 351)
32. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
33. When working with Operating Systems, why would a developer use threads? (variation 101)
34. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
35. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
36. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

37. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
38. Which statement best describes processes in Operating Systems? (variation 90)
39. When working with Operating Systems, why would a developer use threads?
40. What is the most accurate beginner-level explanation of context switching? (variation 82)
41. When working with Operating Systems, why would a developer use system calls? (variation 96)
42. Which statement best describes file systems in Operating Systems? (variation 75)
43. Which statement best describes processes in Operating Systems? (variation 350)
44. When working with Operating Systems, why would a developer use threads? (variation 91)
45. Which option is a correct use case for scheduling in Operating Systems?
46. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
47. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
48. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
49. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
50. When working with Operating Systems, why would a developer use system calls? (variation 106)
51. When working with Operating Systems, why would a developer use threads? (variation 71)
52. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
53. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
54. Which statement best describes processes in Operating Systems? (variation 70)
55. Which statement best describes file systems in Operating Systems? (variation 95)

56. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

57. What is the most accurate beginner-level explanation of deadlocks?

58. When working with Operating Systems, why would a developer use system calls? (variation 76)

59. Which statement best describes file systems in Operating Systems? (variation 85)

60. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
