

IIT-JEE Previous Year Practice 2022 (2022)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
2. When working with Operating Systems, why would a developer use system calls? (variation 86)
3. Which statement best describes processes in Operating Systems? (variation 100)
4. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
5. Which statement best describes file systems in Operating Systems? (variation 355)
6. Which option is a correct use case for virtual memory in Operating Systems?
7. Which statement best describes file systems in Operating Systems? (variation 105)
8. Which statement best describes processes in Operating Systems? (variation 80)
9. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
10. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
11. When working with Operating Systems, why would a developer use threads? (variation 81)
12. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
13. What is the most accurate beginner-level explanation of context switching? (variation 92)
14. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
15. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
16. What is the most accurate beginner-level explanation of deadlocks?
17. A student says 'paging' is not relevant to real projects. What is the best correction?

18. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
19. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
20. When working with Operating Systems, why would a developer use system calls? (variation 76)
21. Which statement best describes processes in Operating Systems? (variation 90)
22. When working with Operating Systems, why would a developer use threads? (variation 101)
23. What is the most accurate beginner-level explanation of context switching? (variation 102)
24. When working with Operating Systems, why would a developer use system calls?
25. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
26. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
27. When working with Operating Systems, why would a developer use system calls? (variation 106)
28. Which statement best describes processes in Operating Systems?
29. Which option is a correct use case for scheduling in Operating Systems?
30. When working with Operating Systems, why would a developer use system calls? (variation 356)
31. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
32. What is the most accurate beginner-level explanation of context switching?
33. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
34. Which statement best describes processes in Operating Systems? (variation 350)
35. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
36. Which statement best describes file systems in Operating Systems? (variation 75)

37. What is the most accurate beginner-level explanation of context switching? (variation 82)
38. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
39. When working with Operating Systems, why would a developer use threads?
40. When working with Operating Systems, why would a developer use threads? (variation 71)
41. When working with Operating Systems, why would a developer use threads? (variation 351)
42. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
43. When working with Operating Systems, why would a developer use threads? (variation 91)
44. A student says 'mutexes' is not relevant to real projects. What is the best correction?
45. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
47. Which statement best describes file systems in Operating Systems?
48. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
49. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
50. Which statement best describes file systems in Operating Systems? (variation 95)
51. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
52. Which statement best describes file systems in Operating Systems? (variation 85)
53. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
54. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
55. What is the most accurate beginner-level explanation of context switching? (variation 72)

56. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)

57. Which statement best describes processes in Operating Systems? (variation 70)

58. What is the most accurate beginner-level explanation of context switching? (variation 352)

59. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

60. When working with Operating Systems, why would a developer use system calls? (variation 96)
