

NEET Previous Year Practice 2017 (2017)

Subject: General | Topic: Operating Systems

1. A student says 'paging' is not relevant to real projects. What is the best correction?
2. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
3. When working with Operating Systems, why would a developer use system calls? (variation 106)
4. What is the most accurate beginner-level explanation of context switching? (variation 92)
5. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
6. Which statement best describes processes in Operating Systems?
7. What is the most accurate beginner-level explanation of context switching? (variation 82)
8. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
9. Which statement best describes processes in Operating Systems? (variation 100)
10. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
11. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
12. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
13. Which statement best describes file systems in Operating Systems? (variation 105)
14. When working with Operating Systems, why would a developer use threads? (variation 81)
15. Which option is a correct use case for virtual memory in Operating Systems?
16. Which statement best describes file systems in Operating Systems? (variation 75)
17. When working with Operating Systems, why would a developer use system calls? (variation 356)

18. Which statement best describes processes in Operating Systems? (variation 80)
19. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
20. When working with Operating Systems, why would a developer use threads?
21. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
22. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
23. Which statement best describes file systems in Operating Systems?
24. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
25. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
26. What is the most accurate beginner-level explanation of context switching?
27. Which statement best describes file systems in Operating Systems? (variation 85)
28. What is the most accurate beginner-level explanation of context switching? (variation 72)
29. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
30. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
31. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
32. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
34. What is the most accurate beginner-level explanation of context switching? (variation 352)
35. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
36. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

37. When working with Operating Systems, why would a developer use system calls? (variation 76)
38. Which option is a correct use case for scheduling in Operating Systems?
39. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
40. When working with Operating Systems, why would a developer use system calls?
41. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
42. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
43. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
44. Which statement best describes processes in Operating Systems? (variation 70)
45. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
46. When working with Operating Systems, why would a developer use threads? (variation 101)
47. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
48. Which statement best describes file systems in Operating Systems? (variation 355)
49. When working with Operating Systems, why would a developer use system calls? (variation 96)
50. Which statement best describes processes in Operating Systems? (variation 350)
51. A student says 'mutexes' is not relevant to real projects. What is the best correction?
52. Which statement best describes processes in Operating Systems? (variation 90)
53. When working with Operating Systems, why would a developer use threads? (variation 91)
54. Which statement best describes file systems in Operating Systems? (variation 95)
55. When working with Operating Systems, why would a developer use threads? (variation 351)

56. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

57. What is the most accurate beginner-level explanation of deadlocks?

58. What is the most accurate beginner-level explanation of context switching? (variation 102)

59. When working with Operating Systems, why would a developer use threads? (variation 71)

60. When working with Operating Systems, why would a developer use system calls? (variation 86)
