

NEET Previous Year Practice 2021 (2021)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
2. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
3. Which statement best describes processes in Operating Systems? (variation 80)
4. What is the most accurate beginner-level explanation of context switching? (variation 102)
5. What is the most accurate beginner-level explanation of context switching?
6. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
7. Which statement best describes file systems in Operating Systems? (variation 95)
8. When working with Operating Systems, why would a developer use threads? (variation 351)
9. Which statement best describes processes in Operating Systems? (variation 70)
10. Which statement best describes file systems in Operating Systems?
11. When working with Operating Systems, why would a developer use threads? (variation 71)
12. When working with Operating Systems, why would a developer use threads?
13. A student says 'mutexes' is not relevant to real projects. What is the best correction?
14. Which statement best describes file systems in Operating Systems? (variation 75)
15. When working with Operating Systems, why would a developer use threads? (variation 101)
16. Which statement best describes processes in Operating Systems? (variation 100)
17. What is the most accurate beginner-level explanation of context switching? (variation 72)

18. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
19. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
20. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
21. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
22. What is the most accurate beginner-level explanation of context switching? (variation 82)
23. Which option is a correct use case for virtual memory in Operating Systems?
24. What is the most accurate beginner-level explanation of deadlocks?
25. Which statement best describes file systems in Operating Systems? (variation 85)
26. Which statement best describes processes in Operating Systems?
27. When working with Operating Systems, why would a developer use system calls? (variation 96)
28. When working with Operating Systems, why would a developer use system calls? (variation 86)
29. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
30. When working with Operating Systems, why would a developer use system calls? (variation 106)
31. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
32. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
34. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
35. When working with Operating Systems, why would a developer use system calls? (variation 76)
36. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)

37. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
38. When working with Operating Systems, why would a developer use threads? (variation 91)
39. Which statement best describes processes in Operating Systems? (variation 350)
40. When working with Operating Systems, why would a developer use system calls?
41. When working with Operating Systems, why would a developer use system calls? (variation 356)
42. What is the most accurate beginner-level explanation of context switching? (variation 352)
43. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
44. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
45. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
46. Which option is a correct use case for scheduling in Operating Systems?
47. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
48. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
49. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
50. Which statement best describes file systems in Operating Systems? (variation 105)
51. When working with Operating Systems, why would a developer use threads? (variation 81)
52. A student says 'paging' is not relevant to real projects. What is the best correction?
53. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
54. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
55. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)

56. Which option is a correct use case for scheduling in Operating Systems? (variation 358)

57. Which statement best describes file systems in Operating Systems? (variation 355)

58. Which statement best describes processes in Operating Systems? (variation 90)

59. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)

60. What is the most accurate beginner-level explanation of context switching? (variation 92)
