

NEET Previous Year Practice 2023 (2023)

Subject: General | Topic: Operating Systems

1. Which statement best describes processes in Operating Systems? (variation 80)
2. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
3. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
4. Which statement best describes file systems in Operating Systems?
5. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
6. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
7. When working with Operating Systems, why would a developer use threads?
8. What is the most accurate beginner-level explanation of context switching?
9. When working with Operating Systems, why would a developer use system calls? (variation 356)
10. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
11. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
12. Which option is a correct use case for virtual memory in Operating Systems?
13. Which statement best describes file systems in Operating Systems? (variation 85)
14. A student says 'mutexes' is not relevant to real projects. What is the best correction?
15. When working with Operating Systems, why would a developer use system calls? (variation 76)
16. When working with Operating Systems, why would a developer use threads? (variation 81)
17. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

18. When working with Operating Systems, why would a developer use threads? (variation 71)
19. When working with Operating Systems, why would a developer use system calls? (variation 106)
20. When working with Operating Systems, why would a developer use system calls?
21. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
22. Which statement best describes file systems in Operating Systems? (variation 95)
23. When working with Operating Systems, why would a developer use threads? (variation 91)
24. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
25. Which statement best describes processes in Operating Systems? (variation 100)
26. When working with Operating Systems, why would a developer use threads? (variation 351)
27. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
28. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
29. Which statement best describes processes in Operating Systems? (variation 70)
30. What is the most accurate beginner-level explanation of context switching? (variation 92)
31. What is the most accurate beginner-level explanation of context switching? (variation 102)
32. Which statement best describes file systems in Operating Systems? (variation 75)
33. When working with Operating Systems, why would a developer use system calls? (variation 96)
34. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
35. Which statement best describes processes in Operating Systems?
36. Which option is a correct use case for scheduling in Operating Systems?

37. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
38. Which statement best describes processes in Operating Systems? (variation 90)
39. What is the most accurate beginner-level explanation of context switching? (variation 352)
40. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
41. Which statement best describes file systems in Operating Systems? (variation 355)
42. Which statement best describes file systems in Operating Systems? (variation 105)
43. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
44. What is the most accurate beginner-level explanation of context switching? (variation 82)
45. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
46. When working with Operating Systems, why would a developer use threads? (variation 101)
47. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
48. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
49. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
50. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
51. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
52. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
53. What is the most accurate beginner-level explanation of context switching? (variation 72)
54. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
55. Which statement best describes processes in Operating Systems? (variation 350)

56. What is the most accurate beginner-level explanation of deadlocks?

57. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

58. When working with Operating Systems, why would a developer use system calls? (variation 86)

59. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

60. A student says 'paging' is not relevant to real projects. What is the best correction?
