

NEET Previous Year Practice 2024 (2024)

Subject: General | Topic: Operating Systems

1. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
2. Which statement best describes file systems in Operating Systems? (variation 355)
3. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
4. What is the most accurate beginner-level explanation of context switching? (variation 72)
5. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
6. When working with Operating Systems, why would a developer use threads? (variation 91)
7. When working with Operating Systems, why would a developer use system calls? (variation 76)
8. Which statement best describes file systems in Operating Systems? (variation 105)
9. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
10. A student says 'paging' is not relevant to real projects. What is the best correction?
11. Which statement best describes processes in Operating Systems? (variation 350)
12. When working with Operating Systems, why would a developer use threads? (variation 101)
13. Which statement best describes processes in Operating Systems?
14. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
15. Which statement best describes processes in Operating Systems? (variation 100)
16. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
17. Which statement best describes file systems in Operating Systems?

18. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
19. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
20. What is the most accurate beginner-level explanation of context switching? (variation 352)
21. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
22. What is the most accurate beginner-level explanation of context switching? (variation 92)
23. Which option is a correct use case for scheduling in Operating Systems?
24. When working with Operating Systems, why would a developer use threads? (variation 71)
25. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
26. When working with Operating Systems, why would a developer use system calls? (variation 86)
27. What is the most accurate beginner-level explanation of context switching?
28. When working with Operating Systems, why would a developer use threads?
29. Which statement best describes processes in Operating Systems? (variation 70)
30. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
31. When working with Operating Systems, why would a developer use system calls?
32. Which statement best describes file systems in Operating Systems? (variation 85)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
34. What is the most accurate beginner-level explanation of context switching? (variation 82)
35. Which option is a correct use case for virtual memory in Operating Systems?
36. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

37. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
38. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
39. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
40. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
41. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
42. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
43. Which statement best describes file systems in Operating Systems? (variation 95)
44. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
45. When working with Operating Systems, why would a developer use system calls? (variation 106)
46. What is the most accurate beginner-level explanation of deadlocks?
47. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
48. What is the most accurate beginner-level explanation of context switching? (variation 102)
49. When working with Operating Systems, why would a developer use system calls? (variation 356)
50. Which statement best describes file systems in Operating Systems? (variation 75)
51. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
52. Which statement best describes processes in Operating Systems? (variation 90)
53. When working with Operating Systems, why would a developer use threads? (variation 81)
54. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
55. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

56. A student says 'mutexes' is not relevant to real projects. What is the best correction?

57. Which statement best describes processes in Operating Systems? (variation 80)

58. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

59. When working with Operating Systems, why would a developer use system calls? (variation 96)

60. When working with Operating Systems, why would a developer use threads? (variation 351)
