

UPSC Previous Year Practice 2018 (2018)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
2. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
3. Which statement best describes processes in Operating Systems? (variation 100)
4. Which option is a correct use case for virtual memory in Operating Systems?
5. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
6. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
7. Which statement best describes file systems in Operating Systems? (variation 105)
8. A student says 'mutexes' is not relevant to real projects. What is the best correction?
9. When working with Operating Systems, why would a developer use threads? (variation 101)
10. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
11. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
12. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
13. What is the most accurate beginner-level explanation of context switching? (variation 102)
14. Which statement best describes processes in Operating Systems? (variation 70)
15. When working with Operating Systems, why would a developer use threads? (variation 91)
16. When working with Operating Systems, why would a developer use threads? (variation 81)
17. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

18. Which statement best describes file systems in Operating Systems? (variation 95)
19. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
20. What is the most accurate beginner-level explanation of context switching? (variation 72)
21. When working with Operating Systems, why would a developer use system calls? (variation 106)
22. When working with Operating Systems, why would a developer use system calls? (variation 356)
23. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
24. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
25. When working with Operating Systems, why would a developer use threads? (variation 71)
26. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
27. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
28. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
29. What is the most accurate beginner-level explanation of context switching?
30. What is the most accurate beginner-level explanation of context switching? (variation 352)
31. When working with Operating Systems, why would a developer use system calls? (variation 86)
32. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
34. Which statement best describes file systems in Operating Systems? (variation 85)
35. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
36. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)

37. Which statement best describes processes in Operating Systems? (variation 350)
38. When working with Operating Systems, why would a developer use threads? (variation 351)
39. When working with Operating Systems, why would a developer use system calls? (variation 76)
40. When working with Operating Systems, why would a developer use system calls?
41. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
42. Which statement best describes processes in Operating Systems? (variation 90)
43. A student says 'paging' is not relevant to real projects. What is the best correction?
44. When working with Operating Systems, why would a developer use system calls? (variation 96)
45. What is the most accurate beginner-level explanation of context switching? (variation 92)
46. Which statement best describes file systems in Operating Systems?
47. Which statement best describes processes in Operating Systems?
48. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
49. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
50. Which option is a correct use case for scheduling in Operating Systems?
51. What is the most accurate beginner-level explanation of context switching? (variation 82)
52. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
53. Which statement best describes processes in Operating Systems? (variation 80)
54. Which statement best describes file systems in Operating Systems? (variation 75)
55. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

56. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

57. What is the most accurate beginner-level explanation of deadlocks?

58. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

59. When working with Operating Systems, why would a developer use threads?

60. Which statement best describes file systems in Operating Systems? (variation 355)
