

UPSC Previous Year Practice 2022 (2022)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use threads? (variation 351)
2. When working with Operating Systems, why would a developer use threads? (variation 81)
3. What is the most accurate beginner-level explanation of context switching?
4. A student says 'paging' is not relevant to real projects. What is the best correction?
5. A student says 'mutexes' is not relevant to real projects. What is the best correction?
6. When working with Operating Systems, why would a developer use threads? (variation 71)
7. When working with Operating Systems, why would a developer use system calls? (variation 96)
8. Which statement best describes processes in Operating Systems? (variation 90)
9. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
10. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
11. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
12. Which statement best describes file systems in Operating Systems?
13. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
14. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
15. What is the most accurate beginner-level explanation of context switching? (variation 92)
16. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
17. What is the most accurate beginner-level explanation of context switching? (variation 72)

18. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
19. Which option is a correct use case for scheduling in Operating Systems?
20. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
21. Which statement best describes file systems in Operating Systems? (variation 105)
22. What is the most accurate beginner-level explanation of context switching? (variation 352)
23. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
24. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
25. Which statement best describes processes in Operating Systems? (variation 80)
26. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
27. When working with Operating Systems, why would a developer use system calls? (variation 86)
28. What is the most accurate beginner-level explanation of context switching? (variation 82)
29. Which statement best describes file systems in Operating Systems? (variation 85)
30. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
31. When working with Operating Systems, why would a developer use threads? (variation 101)
32. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
33. When working with Operating Systems, why would a developer use system calls? (variation 76)
34. Which statement best describes processes in Operating Systems? (variation 350)
35. When working with Operating Systems, why would a developer use threads? (variation 91)
36. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

37. Which statement best describes file systems in Operating Systems? (variation 355)
38. When working with Operating Systems, why would a developer use system calls? (variation 356)
39. Which statement best describes processes in Operating Systems? (variation 70)
40. Which option is a correct use case for virtual memory in Operating Systems?
41. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
42. When working with Operating Systems, why would a developer use threads?
43. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
44. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
45. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
47. What is the most accurate beginner-level explanation of deadlocks?
48. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
49. When working with Operating Systems, why would a developer use system calls?
50. Which statement best describes file systems in Operating Systems? (variation 95)
51. Which statement best describes processes in Operating Systems? (variation 100)
52. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
53. What is the most accurate beginner-level explanation of context switching? (variation 102)
54. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
55. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

56. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)

57. Which statement best describes processes in Operating Systems?

58. When working with Operating Systems, why would a developer use system calls? (variation 106)

59. Which statement best describes file systems in Operating Systems? (variation 75)

60. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
