

UPSC Previous Year Practice 2023 (2023)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use threads? (variation 91)
2. When working with Operating Systems, why would a developer use system calls? (variation 76)
3. What is the most accurate beginner-level explanation of context switching? (variation 352)
4. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
5. Which statement best describes file systems in Operating Systems? (variation 85)
6. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
7. Which statement best describes processes in Operating Systems? (variation 70)
8. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
9. Which statement best describes processes in Operating Systems? (variation 100)
10. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
11. When working with Operating Systems, why would a developer use system calls? (variation 106)
12. When working with Operating Systems, why would a developer use threads? (variation 71)
13. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
14. When working with Operating Systems, why would a developer use threads? (variation 101)
15. Which statement best describes processes in Operating Systems? (variation 350)
16. When working with Operating Systems, why would a developer use threads? (variation 81)
17. Which statement best describes file systems in Operating Systems? (variation 75)

18. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
19. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
20. Which statement best describes file systems in Operating Systems?
21. Which statement best describes file systems in Operating Systems? (variation 95)
22. What is the most accurate beginner-level explanation of context switching? (variation 82)
23. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
24. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
25. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
26. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
27. Which option is a correct use case for virtual memory in Operating Systems?
28. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
29. A student says 'paging' is not relevant to real projects. What is the best correction?
30. A student says 'mutexes' is not relevant to real projects. What is the best correction?
31. What is the most accurate beginner-level explanation of context switching? (variation 92)
32. When working with Operating Systems, why would a developer use system calls? (variation 86)
33. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
34. Which statement best describes processes in Operating Systems?
35. What is the most accurate beginner-level explanation of context switching? (variation 72)
36. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)

37. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
38. Which option is a correct use case for scheduling in Operating Systems?
39. When working with Operating Systems, why would a developer use threads? (variation 351)
40. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
41. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
42. Which statement best describes file systems in Operating Systems? (variation 355)
43. When working with Operating Systems, why would a developer use system calls? (variation 96)
44. Which statement best describes processes in Operating Systems? (variation 80)
45. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
46. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
47. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
48. When working with Operating Systems, why would a developer use system calls?
49. Which statement best describes processes in Operating Systems? (variation 90)
50. What is the most accurate beginner-level explanation of context switching? (variation 102)
51. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
52. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
53. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
54. When working with Operating Systems, why would a developer use threads?
55. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

56. Which statement best describes file systems in Operating Systems? (variation 105)

57. What is the most accurate beginner-level explanation of context switching?

58. What is the most accurate beginner-level explanation of deadlocks?

59. When working with Operating Systems, why would a developer use system calls? (variation 356)

60. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
