

UPSC Previous Year Practice 2025 (2025)

Subject: General | Topic: Operating Systems

1. What is the most accurate beginner-level explanation of context switching?
2. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
3. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
4. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
5. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
6. What is the most accurate beginner-level explanation of deadlocks?
7. When working with Operating Systems, why would a developer use threads?
8. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
9. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
10. When working with Operating Systems, why would a developer use threads? (variation 91)
11. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
12. When working with Operating Systems, why would a developer use system calls? (variation 76)
13. Which statement best describes file systems in Operating Systems? (variation 355)
14. When working with Operating Systems, why would a developer use threads? (variation 81)
15. What is the most accurate beginner-level explanation of context switching? (variation 352)
16. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
17. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

18. Which statement best describes processes in Operating Systems? (variation 70)
19. A student says 'mutexes' is not relevant to real projects. What is the best correction?
20. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
21. Which statement best describes processes in Operating Systems?
22. When working with Operating Systems, why would a developer use threads? (variation 71)
23. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
24. What is the most accurate beginner-level explanation of context switching? (variation 72)
25. Which statement best describes file systems in Operating Systems? (variation 75)
26. When working with Operating Systems, why would a developer use system calls? (variation 86)
27. When working with Operating Systems, why would a developer use system calls? (variation 106)
28. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
29. Which option is a correct use case for virtual memory in Operating Systems?
30. What is the most accurate beginner-level explanation of context switching? (variation 102)
31. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
32. Which statement best describes processes in Operating Systems? (variation 80)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
34. When working with Operating Systems, why would a developer use system calls? (variation 356)
35. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
36. What is the most accurate beginner-level explanation of deadlocks? (variation 87)

37. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
38. Which statement best describes file systems in Operating Systems? (variation 95)
39. Which statement best describes file systems in Operating Systems?
40. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
41. When working with Operating Systems, why would a developer use system calls?
42. When working with Operating Systems, why would a developer use system calls? (variation 96)
43. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
44. Which statement best describes file systems in Operating Systems? (variation 105)
45. Which option is a correct use case for scheduling in Operating Systems?
46. A student says 'paging' is not relevant to real projects. What is the best correction?
47. Which statement best describes processes in Operating Systems? (variation 90)
48. Which statement best describes processes in Operating Systems? (variation 350)
49. When working with Operating Systems, why would a developer use threads? (variation 351)
50. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
51. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
52. When working with Operating Systems, why would a developer use threads? (variation 101)
53. Which statement best describes file systems in Operating Systems? (variation 85)
54. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
55. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

56. What is the most accurate beginner-level explanation of context switching? (variation 92)
57. What is the most accurate beginner-level explanation of context switching? (variation 82)
58. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
59. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
60. Which statement best describes processes in Operating Systems? (variation 100)
