

UPSC Previous Year Practice 2026 (2026)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use system calls? (variation 96)
2. When working with Operating Systems, why would a developer use threads?
3. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
4. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
5. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
6. Which statement best describes processes in Operating Systems? (variation 90)
7. Which statement best describes processes in Operating Systems? (variation 80)
8. When working with Operating Systems, why would a developer use system calls?
9. When working with Operating Systems, why would a developer use threads? (variation 101)
10. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
11. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
12. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
13. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
14. What is the most accurate beginner-level explanation of deadlocks?
15. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
16. What is the most accurate beginner-level explanation of context switching? (variation 72)
17. When working with Operating Systems, why would a developer use threads? (variation 81)

18. When working with Operating Systems, why would a developer use system calls? (variation 106)
19. What is the most accurate beginner-level explanation of context switching?
20. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
21. When working with Operating Systems, why would a developer use system calls? (variation 76)
22. What is the most accurate beginner-level explanation of context switching? (variation 92)
23. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
24. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
25. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
26. Which statement best describes processes in Operating Systems? (variation 100)
27. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
28. A student says 'mutexes' is not relevant to real projects. What is the best correction?
29. When working with Operating Systems, why would a developer use threads? (variation 351)
30. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
31. Which statement best describes file systems in Operating Systems? (variation 355)
32. Which statement best describes file systems in Operating Systems? (variation 95)
33. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
34. What is the most accurate beginner-level explanation of context switching? (variation 82)
35. When working with Operating Systems, why would a developer use threads? (variation 71)
36. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)

37. Which statement best describes file systems in Operating Systems? (variation 75)
38. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
39. Which statement best describes processes in Operating Systems?
40. Which statement best describes file systems in Operating Systems?
41. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
42. What is the most accurate beginner-level explanation of context switching? (variation 102)
43. Which statement best describes file systems in Operating Systems? (variation 105)
44. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
45. When working with Operating Systems, why would a developer use system calls? (variation 86)
46. Which statement best describes file systems in Operating Systems? (variation 85)
47. Which option is a correct use case for scheduling in Operating Systems?
48. A student says 'paging' is not relevant to real projects. What is the best correction?
49. Which statement best describes processes in Operating Systems? (variation 350)
50. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
51. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
52. Which option is a correct use case for virtual memory in Operating Systems?
53. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
54. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
55. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

56. When working with Operating Systems, why would a developer use threads? (variation 91)
57. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
58. What is the most accurate beginner-level explanation of context switching? (variation 352)
59. Which statement best describes processes in Operating Systems? (variation 70)
60. When working with Operating Systems, why would a developer use system calls? (variation 356)
