

University Exams Previous Year Practice 2017 (2017)

Subject: General | Topic: Operating Systems

1. Which statement best describes processes in Operating Systems? (variation 350)
2. A student says 'mutexes' is not relevant to real projects. What is the best correction?
3. When working with Operating Systems, why would a developer use threads? (variation 71)
4. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
5. Which statement best describes file systems in Operating Systems? (variation 85)
6. When working with Operating Systems, why would a developer use system calls? (variation 106)
7. What is the most accurate beginner-level explanation of deadlocks?
8. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
9. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
10. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
11. Which statement best describes processes in Operating Systems? (variation 80)
12. When working with Operating Systems, why would a developer use threads? (variation 101)
13. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
14. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
15. Which statement best describes file systems in Operating Systems? (variation 75)
16. Which statement best describes processes in Operating Systems? (variation 100)
17. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

18. When working with Operating Systems, why would a developer use threads? (variation 91)
19. Which option is a correct use case for virtual memory in Operating Systems?
20. What is the most accurate beginner-level explanation of context switching? (variation 352)
21. A student says 'paging' is not relevant to real projects. What is the best correction?
22. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
23. When working with Operating Systems, why would a developer use threads? (variation 81)
24. Which statement best describes file systems in Operating Systems? (variation 95)
25. When working with Operating Systems, why would a developer use threads? (variation 351)
26. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
27. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
28. Which option is a correct use case for scheduling in Operating Systems?
29. What is the most accurate beginner-level explanation of context switching? (variation 82)
30. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
31. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
32. What is the most accurate beginner-level explanation of context switching? (variation 92)
33. What is the most accurate beginner-level explanation of context switching?
34. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
35. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
36. Which option is a correct use case for scheduling in Operating Systems? (variation 88)

37. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
38. Which statement best describes file systems in Operating Systems? (variation 105)
39. Which statement best describes processes in Operating Systems?
40. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
41. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
42. Which statement best describes file systems in Operating Systems? (variation 355)
43. When working with Operating Systems, why would a developer use system calls? (variation 76)
44. When working with Operating Systems, why would a developer use threads?
45. When working with Operating Systems, why would a developer use system calls? (variation 96)
46. When working with Operating Systems, why would a developer use system calls? (variation 86)
47. When working with Operating Systems, why would a developer use system calls? (variation 356)
48. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
49. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
50. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
51. Which statement best describes processes in Operating Systems? (variation 70)
52. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
53. When working with Operating Systems, why would a developer use system calls?
54. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
55. What is the most accurate beginner-level explanation of context switching? (variation 102)

56. Which statement best describes file systems in Operating Systems?

57. Which statement best describes processes in Operating Systems? (variation 90)

58. What is the most accurate beginner-level explanation of context switching? (variation 72)

59. Which option is a correct use case for scheduling in Operating Systems? (variation 108)

60. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
