

University Exams Previous Year Practice 2018 (2018)

Subject: General | Topic: Operating Systems

1. What is the most accurate beginner-level explanation of context switching? (variation 72)
2. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
3. When working with Operating Systems, why would a developer use threads? (variation 351)
4. When working with Operating Systems, why would a developer use threads?
5. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
6. What is the most accurate beginner-level explanation of context switching? (variation 352)
7. Which statement best describes file systems in Operating Systems? (variation 105)
8. Which statement best describes file systems in Operating Systems?
9. Which statement best describes processes in Operating Systems? (variation 100)
10. A student says 'mutexes' is not relevant to real projects. What is the best correction?
11. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
12. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
13. When working with Operating Systems, why would a developer use system calls? (variation 86)
14. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
15. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
16. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
17. When working with Operating Systems, why would a developer use system calls? (variation 96)

18. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
19. When working with Operating Systems, why would a developer use system calls? (variation 76)
20. When working with Operating Systems, why would a developer use system calls?
21. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
22. Which statement best describes processes in Operating Systems? (variation 350)
23. What is the most accurate beginner-level explanation of context switching? (variation 92)
24. Which statement best describes processes in Operating Systems? (variation 70)
25. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
26. Which statement best describes file systems in Operating Systems? (variation 355)
27. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
28. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
29. Which option is a correct use case for virtual memory in Operating Systems?
30. When working with Operating Systems, why would a developer use system calls? (variation 106)
31. What is the most accurate beginner-level explanation of context switching? (variation 82)
32. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
33. Which statement best describes processes in Operating Systems? (variation 90)
34. When working with Operating Systems, why would a developer use threads? (variation 81)
35. Which statement best describes file systems in Operating Systems? (variation 95)
36. When working with Operating Systems, why would a developer use threads? (variation 71)

37. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
38. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
39. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
40. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
41. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
42. Which option is a correct use case for scheduling in Operating Systems?
43. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
44. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
45. What is the most accurate beginner-level explanation of deadlocks?
46. Which statement best describes processes in Operating Systems? (variation 80)
47. When working with Operating Systems, why would a developer use threads? (variation 101)
48. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
49. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
50. Which statement best describes file systems in Operating Systems? (variation 85)
51. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
52. What is the most accurate beginner-level explanation of context switching?
53. A student says 'paging' is not relevant to real projects. What is the best correction?
54. Which statement best describes file systems in Operating Systems? (variation 75)
55. Which statement best describes processes in Operating Systems?

56. What is the most accurate beginner-level explanation of context switching? (variation 102)
57. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
58. When working with Operating Systems, why would a developer use system calls? (variation 356)
59. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
60. When working with Operating Systems, why would a developer use threads? (variation 91)
