

University Exams Previous Year Practice 2019 (2019)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use system calls? (variation 76)
2. A student says 'paging' is not relevant to real projects. What is the best correction?
3. A student says 'mutexes' is not relevant to real projects. What is the best correction?
4. What is the most accurate beginner-level explanation of context switching? (variation 92)
5. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
6. Which statement best describes file systems in Operating Systems? (variation 105)
7. When working with Operating Systems, why would a developer use threads? (variation 91)
8. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
9. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
10. When working with Operating Systems, why would a developer use threads? (variation 71)
11. Which statement best describes processes in Operating Systems? (variation 100)
12. Which statement best describes file systems in Operating Systems?
13. What is the most accurate beginner-level explanation of context switching?
14. What is the most accurate beginner-level explanation of deadlocks?
15. What is the most accurate beginner-level explanation of context switching? (variation 352)
16. When working with Operating Systems, why would a developer use threads? (variation 101)
17. Which statement best describes processes in Operating Systems? (variation 80)

18. When working with Operating Systems, why would a developer use threads?
19. Which statement best describes file systems in Operating Systems? (variation 85)
20. Which statement best describes file systems in Operating Systems? (variation 355)
21. Which statement best describes processes in Operating Systems? (variation 350)
22. When working with Operating Systems, why would a developer use system calls? (variation 106)
23. When working with Operating Systems, why would a developer use system calls? (variation 356)
24. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
25. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
26. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
27. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
28. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
29. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
30. Which statement best describes processes in Operating Systems? (variation 70)
31. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
32. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
33. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
34. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
35. Which statement best describes processes in Operating Systems?
36. When working with Operating Systems, why would a developer use threads? (variation 351)

37. Which option is a correct use case for scheduling in Operating Systems?
38. When working with Operating Systems, why would a developer use system calls? (variation 86)
39. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
40. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
41. What is the most accurate beginner-level explanation of context switching? (variation 102)
42. Which statement best describes file systems in Operating Systems? (variation 75)
43. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
44. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
45. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
46. Which statement best describes processes in Operating Systems? (variation 90)
47. When working with Operating Systems, why would a developer use threads? (variation 81)
48. Which statement best describes file systems in Operating Systems? (variation 95)
49. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
50. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
51. What is the most accurate beginner-level explanation of context switching? (variation 72)
52. What is the most accurate beginner-level explanation of context switching? (variation 82)
53. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
54. Which option is a correct use case for virtual memory in Operating Systems?
55. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

56. When working with Operating Systems, why would a developer use system calls?
57. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
58. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
59. When working with Operating Systems, why would a developer use system calls? (variation 96)
60. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
