

University Exams Previous Year Practice 2020 (2020)

Subject: General | Topic: Operating Systems

1. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
2. When working with Operating Systems, why would a developer use system calls? (variation 96)
3. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
4. Which statement best describes processes in Operating Systems? (variation 70)
5. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
6. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
7. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
8. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
9. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
10. When working with Operating Systems, why would a developer use threads? (variation 101)
11. Which option is a correct use case for virtual memory in Operating Systems?
12. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
13. What is the most accurate beginner-level explanation of context switching? (variation 92)
14. A student says 'mutexes' is not relevant to real projects. What is the best correction?
15. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
16. Which statement best describes file systems in Operating Systems? (variation 105)
17. What is the most accurate beginner-level explanation of context switching? (variation 72)

18. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
19. What is the most accurate beginner-level explanation of context switching? (variation 102)
20. Which statement best describes processes in Operating Systems? (variation 100)
21. When working with Operating Systems, why would a developer use threads?
22. When working with Operating Systems, why would a developer use threads? (variation 71)
23. Which statement best describes file systems in Operating Systems? (variation 355)
24. Which statement best describes file systems in Operating Systems?
25. A student says 'paging' is not relevant to real projects. What is the best correction?
26. Which option is a correct use case for scheduling in Operating Systems?
27. When working with Operating Systems, why would a developer use threads? (variation 91)
28. Which statement best describes processes in Operating Systems? (variation 350)
29. Which statement best describes file systems in Operating Systems? (variation 95)
30. Which statement best describes processes in Operating Systems? (variation 80)
31. Which statement best describes file systems in Operating Systems? (variation 85)
32. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
33. Which statement best describes file systems in Operating Systems? (variation 75)
34. When working with Operating Systems, why would a developer use system calls? (variation 76)
35. When working with Operating Systems, why would a developer use system calls? (variation 106)
36. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)

37. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
38. What is the most accurate beginner-level explanation of context switching?
39. When working with Operating Systems, why would a developer use system calls? (variation 86)
40. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
41. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
42. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
43. What is the most accurate beginner-level explanation of deadlocks?
44. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
45. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
46. What is the most accurate beginner-level explanation of context switching? (variation 352)
47. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
48. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
49. When working with Operating Systems, why would a developer use system calls? (variation 356)
50. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
51. When working with Operating Systems, why would a developer use threads? (variation 351)
52. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
53. Which statement best describes processes in Operating Systems?
54. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
55. What is the most accurate beginner-level explanation of context switching? (variation 82)

56. When working with Operating Systems, why would a developer use system calls?

57. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)

58. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)

59. When working with Operating Systems, why would a developer use threads? (variation 81)

60. Which statement best describes processes in Operating Systems? (variation 90)
