

University Exams Previous Year Practice 2023 (2023)

Subject: General | Topic: Operating Systems

1. When working with Operating Systems, why would a developer use system calls? (variation 76)
2. What is the most accurate beginner-level explanation of context switching?
3. When working with Operating Systems, why would a developer use threads? (variation 71)
4. What is the most accurate beginner-level explanation of context switching? (variation 352)
5. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
6. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
7. Which statement best describes file systems in Operating Systems? (variation 95)
8. When working with Operating Systems, why would a developer use threads? (variation 91)
9. Which statement best describes processes in Operating Systems? (variation 350)
10. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
11. Which statement best describes file systems in Operating Systems? (variation 355)
12. Which option is a correct use case for scheduling in Operating Systems?
13. Which statement best describes file systems in Operating Systems? (variation 75)
14. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
15. When working with Operating Systems, why would a developer use threads? (variation 351)
16. When working with Operating Systems, why would a developer use threads?
17. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

18. What is the most accurate beginner-level explanation of context switching? (variation 72)
19. When working with Operating Systems, why would a developer use system calls? (variation 356)
20. When working with Operating Systems, why would a developer use system calls?
21. When working with Operating Systems, why would a developer use system calls? (variation 86)
22. Which statement best describes file systems in Operating Systems? (variation 105)
23. Which option is a correct use case for virtual memory in Operating Systems?
24. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
25. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
26. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
27. Which statement best describes processes in Operating Systems? (variation 80)
28. What is the most accurate beginner-level explanation of context switching? (variation 92)
29. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
30. Which statement best describes processes in Operating Systems? (variation 70)
31. Which statement best describes file systems in Operating Systems?
32. When working with Operating Systems, why would a developer use threads? (variation 81)
33. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
34. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
35. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
36. What is the most accurate beginner-level explanation of context switching? (variation 82)

37. What is the most accurate beginner-level explanation of deadlocks?
38. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
39. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
40. What is the most accurate beginner-level explanation of context switching? (variation 102)
41. Which statement best describes processes in Operating Systems? (variation 90)
42. A student says 'paging' is not relevant to real projects. What is the best correction?
43. A student says 'mutexes' is not relevant to real projects. What is the best correction?
44. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
45. Which statement best describes processes in Operating Systems? (variation 100)
46. When working with Operating Systems, why would a developer use threads? (variation 101)
47. When working with Operating Systems, why would a developer use system calls? (variation 106)
48. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
49. Which statement best describes file systems in Operating Systems? (variation 85)
50. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
51. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
52. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
53. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
54. Which statement best describes processes in Operating Systems?
55. What is the most accurate beginner-level explanation of deadlocks? (variation 357)

56. When working with Operating Systems, why would a developer use system calls? (variation 96)

57. Which option is a correct use case for scheduling in Operating Systems? (variation 98)

58. What is the most accurate beginner-level explanation of deadlocks? (variation 107)

59. What is the most accurate beginner-level explanation of deadlocks? (variation 97)

60. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
