

University Exams Previous Year Practice 2024 (2024)

Subject: General | Topic: Operating Systems

1. Which statement best describes file systems in Operating Systems? (variation 85)
2. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
3. What is the most accurate beginner-level explanation of context switching? (variation 72)
4. When working with Operating Systems, why would a developer use threads? (variation 351)
5. Which statement best describes processes in Operating Systems? (variation 70)
6. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
7. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
8. Which statement best describes file systems in Operating Systems? (variation 95)
9. When working with Operating Systems, why would a developer use threads? (variation 101)
10. What is the most accurate beginner-level explanation of context switching? (variation 92)
11. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
12. What is the most accurate beginner-level explanation of deadlocks? (variation 77)
13. Which statement best describes processes in Operating Systems? (variation 350)
14. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)
15. Which statement best describes processes in Operating Systems?
16. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
17. Which statement best describes file systems in Operating Systems? (variation 355)

18. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
19. Which statement best describes processes in Operating Systems? (variation 90)
20. When working with Operating Systems, why would a developer use threads?
21. When working with Operating Systems, why would a developer use system calls? (variation 96)
22. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
23. Which option is a correct use case for virtual memory in Operating Systems?
24. What is the most accurate beginner-level explanation of context switching? (variation 352)
25. Which statement best describes file systems in Operating Systems? (variation 75)
26. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
27. When working with Operating Systems, why would a developer use system calls? (variation 106)
28. Which statement best describes file systems in Operating Systems?
29. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
30. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
31. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
32. When working with Operating Systems, why would a developer use system calls? (variation 86)
33. When working with Operating Systems, why would a developer use system calls?
34. When working with Operating Systems, why would a developer use system calls? (variation 356)
35. What is the most accurate beginner-level explanation of context switching? (variation 102)
36. When working with Operating Systems, why would a developer use threads? (variation 91)

37. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
38. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
39. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
40. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
41. What is the most accurate beginner-level explanation of deadlocks?
42. What is the most accurate beginner-level explanation of context switching?
43. Which statement best describes file systems in Operating Systems? (variation 105)
44. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
45. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)
46. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
47. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)
48. When working with Operating Systems, why would a developer use threads? (variation 81)
49. Which statement best describes processes in Operating Systems? (variation 80)
50. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
51. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
52. Which option is a correct use case for scheduling in Operating Systems?
53. What is the most accurate beginner-level explanation of context switching? (variation 82)
54. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)
55. A student says 'mutexes' is not relevant to real projects. What is the best correction?

56. When working with Operating Systems, why would a developer use threads? (variation 71)
57. Which statement best describes processes in Operating Systems? (variation 100)
58. When working with Operating Systems, why would a developer use system calls? (variation 76)
59. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
60. A student says 'paging' is not relevant to real projects. What is the best correction?
