

University Exams Previous Year Practice 2026 (2026)

Subject: General | Topic: Operating Systems

1. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 109)
2. Which option is a correct use case for virtual memory in Operating Systems? (variation 353)
3. What is the most accurate beginner-level explanation of deadlocks? (variation 357)
4. Which option is a correct use case for scheduling in Operating Systems?
5. When working with Operating Systems, why would a developer use system calls? (variation 106)
6. Which statement best describes file systems in Operating Systems? (variation 355)
7. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 359)
8. Which option is a correct use case for scheduling in Operating Systems? (variation 108)
9. Which option is a correct use case for scheduling in Operating Systems? (variation 88)
10. Which statement best describes file systems in Operating Systems? (variation 105)
11. Which option is a correct use case for scheduling in Operating Systems? (variation 358)
12. When working with Operating Systems, why would a developer use system calls?
13. Which statement best describes file systems in Operating Systems? (variation 75)
14. Which statement best describes file systems in Operating Systems? (variation 95)
15. Which statement best describes processes in Operating Systems? (variation 90)
16. What is the most accurate beginner-level explanation of deadlocks?
17. Which statement best describes processes in Operating Systems? (variation 100)

18. Which statement best describes processes in Operating Systems?
19. When working with Operating Systems, why would a developer use threads? (variation 91)
20. What is the most accurate beginner-level explanation of context switching?
21. Which option is a correct use case for scheduling in Operating Systems? (variation 98)
22. When working with Operating Systems, why would a developer use system calls? (variation 76)
23. What is the most accurate beginner-level explanation of deadlocks? (variation 87)
24. Which statement best describes file systems in Operating Systems? (variation 85)
25. Which option is a correct use case for virtual memory in Operating Systems?
26. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 84)
27. When working with Operating Systems, why would a developer use threads? (variation 101)
28. What is the most accurate beginner-level explanation of context switching? (variation 72)
29. Which statement best describes file systems in Operating Systems?
30. When working with Operating Systems, why would a developer use system calls? (variation 96)
31. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 99)
32. What is the most accurate beginner-level explanation of context switching? (variation 92)
33. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 354)
34. When working with Operating Systems, why would a developer use threads?
35. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 79)
36. What is the most accurate beginner-level explanation of deadlocks? (variation 77)

37. When working with Operating Systems, why would a developer use system calls? (variation 356)
38. When working with Operating Systems, why would a developer use system calls? (variation 86)
39. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 94)
40. Which option is a correct use case for scheduling in Operating Systems? (variation 78)
41. When working with Operating Systems, why would a developer use threads? (variation 71)
42. What is the most accurate beginner-level explanation of deadlocks? (variation 107)
43. When working with Operating Systems, why would a developer use threads? (variation 81)
44. What is the most accurate beginner-level explanation of context switching? (variation 352)
45. A student says 'mutexes' is not relevant to real projects. What is the best correction?
46. Which statement best describes processes in Operating Systems? (variation 80)
47. What is the most accurate beginner-level explanation of deadlocks? (variation 97)
48. What is the most accurate beginner-level explanation of context switching? (variation 102)
49. When working with Operating Systems, why would a developer use threads? (variation 351)
50. Which option is a correct use case for virtual memory in Operating Systems? (variation 73)
51. Which statement best describes processes in Operating Systems? (variation 350)
52. Which statement best describes processes in Operating Systems? (variation 70)
53. Which option is a correct use case for virtual memory in Operating Systems? (variation 103)
54. Which option is a correct use case for virtual memory in Operating Systems? (variation 83)
55. Which option is a correct use case for virtual memory in Operating Systems? (variation 93)

56. A student says 'mutexes' is not relevant to real projects. What is the best correction? (variation 89)

57. A student says 'paging' is not relevant to real projects. What is the best correction?

58. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 74)

59. A student says 'paging' is not relevant to real projects. What is the best correction? (variation 104)

60. What is the most accurate beginner-level explanation of context switching? (variation 82)
