

CBSE Previous Year Practice 2017 (2017)

Subject: General | Topic: Data Structures & Algorithms

1. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
2. What is the most accurate beginner-level explanation of linked lists? (variation 92)
3. Which statement best describes Big O notation in Data Structures & Algorithms?
4. When working with Data Structures & Algorithms, why would a developer use binary search?
5. When working with Data Structures & Algorithms, why would a developer use binary trees?
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
7. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
8. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
9. What is the most accurate beginner-level explanation of linked lists? (variation 82)
10. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
11. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
12. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
13. Which option is a correct use case for merge sort in Data Structures & Algorithms?
14. What is the most accurate beginner-level explanation of recursion? (variation 97)
15. A student says 'queues' is not relevant to real projects. What is the best correction?
16. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
17. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

18. Which option is a correct use case for stacks in Data Structures & Algorithms?
19. What is the most accurate beginner-level explanation of recursion? (variation 107)
20. Which statement best describes hash tables in Data Structures & Algorithms?
21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
22. What is the most accurate beginner-level explanation of linked lists?
23. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
24. What is the most accurate beginner-level explanation of linked lists? (variation 82)
25. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
26. What is the most accurate beginner-level explanation of linked lists? (variation 102)
27. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
28. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
29. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
30. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
31. What is the most accurate beginner-level explanation of recursion?
32. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
33. What is the most accurate beginner-level explanation of linked lists? (variation 72)
34. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
35. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
36. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

37. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
38. What is the most accurate beginner-level explanation of linked lists? (variation 72)
39. What is the most accurate beginner-level explanation of recursion? (variation 97)
40. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
41. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
42. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
43. What is the most accurate beginner-level explanation of linked lists?
44. What is the most accurate beginner-level explanation of recursion? (variation 77)
45. What is the most accurate beginner-level explanation of recursion?
46. Which option is a correct use case for merge sort in Data Structures & Algorithms?
47. What is the most accurate beginner-level explanation of linked lists? (variation 102)
48. Which statement best describes hash tables in Data Structures & Algorithms?
49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
50. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
51. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
52. What is the most accurate beginner-level explanation of linked lists? (variation 92)
53. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
54. When working with Data Structures & Algorithms, why would a developer use binary search?
55. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

56. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
57. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
58. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
59. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
60. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
