

CBSE Previous Year Practice 2018 (2018)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of recursion? (variation 77)
2. When working with Data Structures & Algorithms, why would a developer use binary search?
3. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
4. What is the most accurate beginner-level explanation of linked lists? (variation 72)
5. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
6. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
7. Which option is a correct use case for merge sort in Data Structures & Algorithms?
8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
9. What is the most accurate beginner-level explanation of linked lists? (variation 92)
10. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
11. Which statement best describes Big O notation in Data Structures & Algorithms?
12. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
13. What is the most accurate beginner-level explanation of recursion?
14. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
15. Which option is a correct use case for merge sort in Data Structures & Algorithms?
16. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
17. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

18. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
19. When working with Data Structures & Algorithms, why would a developer use binary search?
20. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
21. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
22. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
23. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
24. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
25. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
26. What is the most accurate beginner-level explanation of linked lists? (variation 82)
27. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
28. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
29. When working with Data Structures & Algorithms, why would a developer use binary search?
30. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
31. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
32. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
33. What is the most accurate beginner-level explanation of recursion? (variation 107)
34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
35. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
36. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)

37. What is the most accurate beginner-level explanation of linked lists? (variation 82)
38. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
39. What is the most accurate beginner-level explanation of recursion? (variation 97)
40. What is the most accurate beginner-level explanation of recursion? (variation 87)
41. When working with Data Structures & Algorithms, why would a developer use binary trees?
42. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
43. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
44. Which option is a correct use case for stacks in Data Structures & Algorithms?
45. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
46. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
47. What is the most accurate beginner-level explanation of linked lists?
48. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
50. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
51. Which statement best describes hash tables in Data Structures & Algorithms?
52. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
53. A student says 'queues' is not relevant to real projects. What is the best correction?
54. A student says 'queues' is not relevant to real projects. What is the best correction?
55. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

56. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
57. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
58. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
59. What is the most accurate beginner-level explanation of linked lists?
60. What is the most accurate beginner-level explanation of linked lists? (variation 92)
