

CBSE Previous Year Practice 2019 (2019)

Subject: General | Topic: Data Structures & Algorithms

1. Which statement best describes Big O notation in Data Structures & Algorithms?
2. What is the most accurate beginner-level explanation of linked lists? (variation 82)
3. Which option is a correct use case for merge sort in Data Structures & Algorithms?
4. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
5. When working with Data Structures & Algorithms, why would a developer use binary trees?
6. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
7. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
8. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
9. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
10. A student says 'queues' is not relevant to real projects. What is the best correction?
11. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
12. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
13. What is the most accurate beginner-level explanation of linked lists? (variation 92)
14. What is the most accurate beginner-level explanation of recursion?
15. Which statement best describes hash tables in Data Structures & Algorithms?
16. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)

18. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
19. When working with Data Structures & Algorithms, why would a developer use binary trees?
20. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
21. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
22. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
23. Which statement best describes hash tables in Data Structures & Algorithms?
24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
25. What is the most accurate beginner-level explanation of recursion? (variation 107)
26. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
27. Which statement best describes hash tables in Data Structures & Algorithms?
28. What is the most accurate beginner-level explanation of linked lists? (variation 102)
29. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
30. What is the most accurate beginner-level explanation of linked lists? (variation 92)
31. Which option is a correct use case for stacks in Data Structures & Algorithms?
32. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
33. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
34. When working with Data Structures & Algorithms, why would a developer use binary search?
35. What is the most accurate beginner-level explanation of recursion?
36. When working with Data Structures & Algorithms, why would a developer use binary search?

37. What is the most accurate beginner-level explanation of linked lists?
38. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
39. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
40. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
41. What is the most accurate beginner-level explanation of linked lists?
42. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
43. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
44. What is the most accurate beginner-level explanation of recursion? (variation 87)
45. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
46. What is the most accurate beginner-level explanation of linked lists? (variation 72)
47. What is the most accurate beginner-level explanation of linked lists? (variation 72)
48. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
49. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
51. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
52. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
53. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
54. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
55. Which statement best describes Big O notation in Data Structures & Algorithms?

56. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

57. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

58. What is the most accurate beginner-level explanation of recursion? (variation 97)

59. What is the most accurate beginner-level explanation of linked lists? (variation 102)

60. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
