

CBSE Previous Year Practice 2020 (2020)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
2. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
3. Which statement best describes hash tables in Data Structures & Algorithms?
4. What is the most accurate beginner-level explanation of linked lists? (variation 102)
5. What is the most accurate beginner-level explanation of linked lists? (variation 92)
6. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
7. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
8. When working with Data Structures & Algorithms, why would a developer use binary trees?
9. What is the most accurate beginner-level explanation of linked lists? (variation 72)
10. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
13. When working with Data Structures & Algorithms, why would a developer use binary trees?
14. What is the most accurate beginner-level explanation of linked lists? (variation 82)
15. What is the most accurate beginner-level explanation of recursion?
16. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
17. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)

18. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
19. What is the most accurate beginner-level explanation of linked lists? (variation 72)
20. What is the most accurate beginner-level explanation of recursion? (variation 97)
21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
22. What is the most accurate beginner-level explanation of recursion? (variation 97)
23. When working with Data Structures & Algorithms, why would a developer use binary search?
24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
25. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
27. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
28. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
29. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
30. What is the most accurate beginner-level explanation of linked lists?
31. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
32. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
33. A student says 'queues' is not relevant to real projects. What is the best correction?
34. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
36. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

37. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
38. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
39. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
40. What is the most accurate beginner-level explanation of linked lists? (variation 82)
41. What is the most accurate beginner-level explanation of linked lists? (variation 92)
42. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
43. What is the most accurate beginner-level explanation of linked lists?
44. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
45. Which option is a correct use case for stacks in Data Structures & Algorithms?
46. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
47. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
48. What is the most accurate beginner-level explanation of linked lists? (variation 92)
49. When working with Data Structures & Algorithms, why would a developer use binary search?
50. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
51. When working with Data Structures & Algorithms, why would a developer use binary search?
52. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
54. What is the most accurate beginner-level explanation of recursion?
55. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)

56. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

57. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

58. A student says 'queues' is not relevant to real projects. What is the best correction?

59. When working with Data Structures & Algorithms, why would a developer use binary search?

60. What is the most accurate beginner-level explanation of recursion? (variation 87)
