

CBSE Previous Year Practice 2022 (2022)

Subject: General | Topic: Data Structures & Algorithms

1. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
2. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
3. What is the most accurate beginner-level explanation of linked lists? (variation 102)
4. What is the most accurate beginner-level explanation of linked lists? (variation 92)
5. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
6. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
7. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
8. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
9. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
10. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
11. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
13. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
14. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
15. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
16. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
17. What is the most accurate beginner-level explanation of linked lists? (variation 82)

18. What is the most accurate beginner-level explanation of recursion? (variation 97)
19. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
20. Which option is a correct use case for merge sort in Data Structures & Algorithms?
21. What is the most accurate beginner-level explanation of linked lists? (variation 92)
22. What is the most accurate beginner-level explanation of recursion? (variation 107)
23. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
24. What is the most accurate beginner-level explanation of linked lists? (variation 102)
25. What is the most accurate beginner-level explanation of recursion?
26. Which statement best describes hash tables in Data Structures & Algorithms?
27. When working with Data Structures & Algorithms, why would a developer use binary search?
28. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
29. What is the most accurate beginner-level explanation of linked lists?
30. What is the most accurate beginner-level explanation of linked lists?
31. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
32. A student says 'queues' is not relevant to real projects. What is the best correction?
33. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
34. What is the most accurate beginner-level explanation of linked lists? (variation 92)
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
36. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)

37. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
38. What is the most accurate beginner-level explanation of recursion? (variation 87)
39. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
40. Which statement best describes Big O notation in Data Structures & Algorithms?
41. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
42. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
43. What is the most accurate beginner-level explanation of linked lists? (variation 102)
44. What is the most accurate beginner-level explanation of recursion? (variation 77)
45. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
46. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
47. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
48. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
49. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
50. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
51. When working with Data Structures & Algorithms, why would a developer use binary search?
52. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
53. What is the most accurate beginner-level explanation of linked lists? (variation 72)
54. When working with Data Structures & Algorithms, why would a developer use binary search?
55. What is the most accurate beginner-level explanation of linked lists? (variation 72)

56. When working with Data Structures & Algorithms, why would a developer use binary trees?
57. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
58. What is the most accurate beginner-level explanation of linked lists? (variation 82)
59. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
60. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
