

CBSE Previous Year Practice 2023 (2023)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists?
2. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
3. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
4. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
5. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
6. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
7. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
9. What is the most accurate beginner-level explanation of linked lists? (variation 92)
10. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
12. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
13. What is the most accurate beginner-level explanation of linked lists?
14. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
15. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
16. What is the most accurate beginner-level explanation of linked lists?
17. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)

18. What is the most accurate beginner-level explanation of linked lists? (variation 82)
19. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
20. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)
21. What is the most accurate beginner-level explanation of recursion? (variation 97)
22. Which statement best describes hash tables in Data Structures & Algorithms?
23. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
25. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
26. What is the most accurate beginner-level explanation of linked lists? (variation 102)
27. What is the most accurate beginner-level explanation of linked lists? (variation 102)
28. When working with Data Structures & Algorithms, why would a developer use binary trees?
29. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
30. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
31. When working with Data Structures & Algorithms, why would a developer use binary search?
32. What is the most accurate beginner-level explanation of recursion? (variation 77)
33. A student says 'queues' is not relevant to real projects. What is the best correction?
34. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
36. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)

37. What is the most accurate beginner-level explanation of recursion?
38. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
39. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
40. Which statement best describes hash tables in Data Structures & Algorithms?
41. When working with Data Structures & Algorithms, why would a developer use binary search?
42. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
43. Which option is a correct use case for merge sort in Data Structures & Algorithms?
44. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
45. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
46. When working with Data Structures & Algorithms, why would a developer use binary search?
47. What is the most accurate beginner-level explanation of recursion? (variation 107)
48. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
50. A student says 'queues' is not relevant to real projects. What is the best correction?
51. What is the most accurate beginner-level explanation of recursion?
52. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
53. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
54. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
55. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)

56. Which statement best describes hash tables in Data Structures & Algorithms?
57. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
58. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
59. What is the most accurate beginner-level explanation of recursion? (variation 97)
60. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
