

CBSE Previous Year Practice 2024 (2024)

Subject: General | Topic: Data Structures & Algorithms

1. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
2. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
3. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
4. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
5. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
6. What is the most accurate beginner-level explanation of recursion? (variation 107)
7. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
8. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
9. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
10. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
11. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
13. What is the most accurate beginner-level explanation of recursion?
14. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
15. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
16. What is the most accurate beginner-level explanation of recursion? (variation 97)
17. When working with Data Structures & Algorithms, why would a developer use binary search?

18. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
19. Which option is a correct use case for stacks in Data Structures & Algorithms?
20. When working with Data Structures & Algorithms, why would a developer use binary search?
21. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
22. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
23. Which statement best describes Big O notation in Data Structures & Algorithms?
24. When working with Data Structures & Algorithms, why would a developer use binary trees?
25. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
26. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
27. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
28. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
29. What is the most accurate beginner-level explanation of linked lists? (variation 102)
30. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
31. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
32. What is the most accurate beginner-level explanation of recursion? (variation 77)
33. A student says 'queues' is not relevant to real projects. What is the best correction?
34. When working with Data Structures & Algorithms, why would a developer use binary search?
35. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
36. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)

37. What is the most accurate beginner-level explanation of recursion?
38. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
39. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
40. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
41. When working with Data Structures & Algorithms, why would a developer use binary search?
42. What is the most accurate beginner-level explanation of linked lists? (variation 92)
43. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 90)
44. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
45. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
46. What is the most accurate beginner-level explanation of linked lists? (variation 72)
47. Which statement best describes hash tables in Data Structures & Algorithms?
48. Which option is a correct use case for merge sort in Data Structures & Algorithms?
49. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
50. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
51. What is the most accurate beginner-level explanation of recursion? (variation 87)
52. What is the most accurate beginner-level explanation of linked lists? (variation 82)
53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
54. What is the most accurate beginner-level explanation of linked lists?
55. Which statement best describes hash tables in Data Structures & Algorithms?

56. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)

57. A student says 'queues' is not relevant to real projects. What is the best correction?

58. Which statement best describes Big O notation in Data Structures & Algorithms?

59. What is the most accurate beginner-level explanation of linked lists? (variation 102)

60. What is the most accurate beginner-level explanation of linked lists? (variation 72)
