

CBSE Previous Year Practice 2025 (2025)

Subject: General | Topic: Data Structures & Algorithms

1. What is the most accurate beginner-level explanation of linked lists? (variation 82)
2. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
3. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
4. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
5. What is the most accurate beginner-level explanation of linked lists?
6. What is the most accurate beginner-level explanation of recursion? (variation 97)
7. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
8. A student says 'queues' is not relevant to real projects. What is the best correction?
9. What is the most accurate beginner-level explanation of recursion?
10. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)
11. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
12. Which statement best describes hash tables in Data Structures & Algorithms?
13. Which statement best describes hash tables in Data Structures & Algorithms?
14. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
15. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
16. Which statement best describes hash tables in Data Structures & Algorithms?
17. What is the most accurate beginner-level explanation of linked lists? (variation 102)

18. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
19. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
20. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
21. Which statement best describes hash tables in Data Structures & Algorithms? (variation 95)
22. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
23. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
24. What is the most accurate beginner-level explanation of recursion? (variation 107)
25. Which statement best describes Big O notation in Data Structures & Algorithms?
26. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
27. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
28. What is the most accurate beginner-level explanation of recursion?
29. What is the most accurate beginner-level explanation of linked lists?
30. When working with Data Structures & Algorithms, why would a developer use binary trees?
31. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 106)
32. Which statement best describes hash tables in Data Structures & Algorithms? (variation 105)
33. What is the most accurate beginner-level explanation of recursion? (variation 97)
34. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
35. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
36. A student says 'graph traversal' is not relevant to real projects. What is the best correction?

37. What is the most accurate beginner-level explanation of linked lists? (variation 72)
38. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
39. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
40. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)
41. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
42. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
43. When working with Data Structures & Algorithms, why would a developer use binary trees?
44. Which statement best describes Big O notation in Data Structures & Algorithms?
45. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 71)
46. What is the most accurate beginner-level explanation of recursion?
47. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
48. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
49. When working with Data Structures & Algorithms, why would a developer use binary search?
50. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
51. What is the most accurate beginner-level explanation of linked lists? (variation 92)
52. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
53. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
54. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
55. When working with Data Structures & Algorithms, why would a developer use binary search?

56. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 94)

57. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)

58. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)

59. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)

60. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)
