

CBSE Previous Year Practice 2026 (2026)

Subject: General | Topic: Data Structures & Algorithms

1. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)
2. What is the most accurate beginner-level explanation of linked lists?
3. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 70)
4. When working with Data Structures & Algorithms, why would a developer use binary search?
5. Which statement best describes Big O notation in Data Structures & Algorithms?
6. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 84)
7. When working with Data Structures & Algorithms, why would a developer use binary search?
8. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
9. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
10. What is the most accurate beginner-level explanation of recursion? (variation 97)
11. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 83)
12. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)
13. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)
14. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 96)
15. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 100)
16. What is the most accurate beginner-level explanation of recursion? (variation 97)
17. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 103)

18. What is the most accurate beginner-level explanation of linked lists? (variation 92)
19. Which option is a correct use case for stacks in Data Structures & Algorithms?
20. Which option is a correct use case for merge sort in Data Structures & Algorithms?
21. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
22. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 76)
23. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
24. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
25. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
26. What is the most accurate beginner-level explanation of recursion?
27. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 73)
28. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 79)
29. What is the most accurate beginner-level explanation of linked lists?
30. When working with Data Structures & Algorithms, why would a developer use binary trees? (variation 86)
31. Which statement best describes Big O notation in Data Structures & Algorithms? (variation 80)
32. Which statement best describes hash tables in Data Structures & Algorithms?
33. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
34. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 89)
35. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 101)
36. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 109)

37. When working with Data Structures & Algorithms, why would a developer use binary search?
38. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
39. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 98)
40. What is the most accurate beginner-level explanation of linked lists? (variation 92)
41. What is the most accurate beginner-level explanation of recursion? (variation 107)
42. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
43. Which option is a correct use case for stacks in Data Structures & Algorithms? (variation 93)
44. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
45. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 81)
46. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
47. When working with Data Structures & Algorithms, why would a developer use binary search?
48. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 108)
49. A student says 'graph traversal' is not relevant to real projects. What is the best correction? (variation 99)
50. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 104)
51. What is the most accurate beginner-level explanation of linked lists? (variation 72)
52. Which statement best describes hash tables in Data Structures & Algorithms? (variation 75)
53. Which statement best describes hash tables in Data Structures & Algorithms? (variation 85)
54. Which statement best describes hash tables in Data Structures & Algorithms?
55. When working with Data Structures & Algorithms, why would a developer use binary trees?

56. A student says 'queues' is not relevant to real projects. What is the best correction? (variation 74)

57. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 88)

58. When working with Data Structures & Algorithms, why would a developer use binary search? (variation 91)

59. Which option is a correct use case for merge sort in Data Structures & Algorithms? (variation 78)

60. A student says 'graph traversal' is not relevant to real projects. What is the best correction?
